

Biogen to Participate in Webinar with Alzheimer's Disease International on January 14, 2021

January 8, 2021

Cambridge, Mass. – [Biogen](#) (Nasdaq: BIIB) today announced it will participate in a webinar with Alzheimer's Disease International (ADI) including a presentation related to its Alzheimer's disease investigational therapy, aducanumab, as well as a live question and answer (Q&A) session. All data in this presentation have been previously disclosed.

Webcast Details:

- Thursday, January 14, 9:00 a.m. ET – *Aducanumab data review by Samantha Budd Haeberlein, Ph.D., Senior Vice President, Head Neurodegeneration Development Unit at Biogen followed by Q&A moderated by ADI's Chief Executive Paola Barbarino and Chair of ADI's Medical and Scientific Panel Dr. Alireza Atri.*

To access the webinar, please go to the Investors section of Biogen's website at investors.biogen.com. An archived version of the webinar will be available following the presentation.

About Biogen

At Biogen, our mission is clear: we are pioneers in neuroscience. Biogen discovers, develops and delivers worldwide innovative therapies for people living with serious neurological and neurodegenerative diseases as well as related therapeutic adjacencies. One of the world's first global biotechnology companies, Biogen was founded in 1978 by Charles Weissmann, Heinz Schaller, Kenneth Murray and Nobel Prize winners Walter Gilbert and Phillip Sharp. Today Biogen has the leading portfolio of medicines to treat multiple sclerosis, has introduced the first approved treatment for spinal muscular atrophy, commercializes biosimilars of advanced biologics and is focused on advancing research programs in multiple sclerosis and neuroimmunology, Alzheimer's disease and dementia, neuromuscular disorders, movement disorders, ophthalmology, immunology, neurocognitive disorders, acute neurology and pain.

We routinely post information that may be important to investors on our website at www.biogen.com. To learn more, please visit www.biogen.com and follow us on social media – [Twitter](#), [LinkedIn](#), [Facebook](#), [YouTube](#).

About Aducanumab

Aducanumab (BIIB037) is an investigational human monoclonal antibody studied for the treatment of Alzheimer's disease. Based on clinical data from patients with Mild Cognitive Impairment due to Alzheimer's disease and mild Alzheimer's disease, aducanumab has the potential to impact underlying disease pathophysiology, slow cognitive and functional decline and provide benefits on patients' ability to perform activities of daily living, including conducting personal finances, performing household chores, such as cleaning, shopping and doing laundry, and independently traveling out of the home. If approved, aducanumab would be the first treatment to meaningfully change the course of the disease for individuals living with Alzheimer's.

Biogen licensed aducanumab from Neurimmune under a collaborative development and license agreement. Since October 2017 Biogen and Eisai have collaborated on the development and commercialization of aducanumab globally.
