The reconciling items between the GAAP diluted EPS and non-GAAP diluted EPS for full year 2008 are itemized in Table 3 within this press release.

#### **Recent Highlights**

- On October 6, 2008, Biogen Idec and Genentech announced that a global Phase III study of RITUXAN in combination with fludarabine and cyclophosphamide chemotherapy met its primary endpoint of improving progression-free survival (PFS), as assessed by investigators, in patients with previously treated CD20-positive chronic lymphocytic leukemia (CLL) compared to chemotherapy alone. There were no new or unexpected safety signals reported in the study. An independent review of the primary endpoint is being conducted for U.S. regulatory purposes.
- On September 18, 2008, Biogen Idec announced that data was presented from the ASSURANCE (ASSessment of Drug Utilization, EaRly TreAtmeNt, and Clinical OutcomEs) study, showing the long-term benefits of AVONEX® therapy in patients with relapsing multiple sclerosis (MS) for up to 15 years. The ASSURANCE study represents the long-term follow-up of patients who participated in the Multiple Sclerosis Collaborative Research Group (MSCRG), the original Phase III pivotal trial from which AVONEX was approved.
- On September 5, 2008, Biogen Idec and Elan Corporation, plc announced the initiation of the first clinical trial of TYSABRI in oncology. The objectives of this Phase I/II study are to evaluate the safety and potential anti-tumor activity of TYSABRI in patients with relapsed or refractory multiple myeloma. TYSABRI is a recombinant, humanized monoclonal antibody that targets the adhesion molecule VLA4 (also known as alpha-4 integrin) that is expressed on the surface of many types of immune cells. VLA4 is also found on the surface of multiple myeloma cells and may be involved in their survival.
- On August 21, 2008, Biogen Idec announced the initiation of a Phase III clinical trial of intravenous (IV) ADENTRI® (BG9928), an adenosine A1 receptor antagonist, for acute decompensated heart failure (ADHF) patients with renal insufficiency. The trial will evaluate ADENTRI, which is being developed under a licensing agreement with CV Therapeutics (Nasdaq: CVTX), or placebo in addition to standard of care in approximately 900 patients in 21 countries globally, including the United States.

**Use of Non-GAAP Financial Measures**

Our “non-GAAP net income” and “non-GAAP diluted EPS” financial measures exclude the following items from GAAP net income and diluted EPS:

**1. Purchase accounting and merger-related adjustments.**

We exclude certain purchase accounting impacts, such as those related to our 2003 merger with Biogen, Inc., the acquisitions of Fumapharm AG, Conformia Therapeutics and Syntonix Pharmaceuticals, and the consolidation of Cardiokine and Neurimmune. These include charges for in-process research and development and the incremental charges related to the amortization of the acquired intangible assets. Excluding these charges provides management and investors with a supplemental measure of performance in which the Company’s acquired intellectual property is treated in a comparable manner to its internally developed intellectual property.

**2. Stock option expense recorded in accordance with SFAS 123R.**

We believe that excluding the impact of expensing stock options better reflects the recurring economic characteristics of our business. We also exclude stock option expense from our non-GAAP R&D expenses and SG&A expenses, but include P&L impact of restricted stock awards and cash incentives in our non-GAAP results.

**3. Unusual or non-recurring items.**

We evaluate these on an individual basis, and consider both the quantitative and qualitative aspects of the item, including (i) its size and nature, (ii) whether or not it relates to our ongoing business operations, and (iii) whether or not we expect it to occur as part of our normal business on a regular basis.

We believe it is important to share these non-GAAP financial measures with shareholders as they better represent the ongoing economics of the business, reflect how we manage the business internally and set operational goals, and form the basis of our management incentive programs. Non-GAAP net income and diluted EPS should not be viewed in isolation or as a substitute for reported, or GAAP, net income and diluted EPS.
