Form 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2013

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission File Number 0-19311

BIOGEN IDEC INC.

(Exact name of registrant as specified in its charter)

Delaware

*(State or other jurisdiction of
incorporation or organization)*

33-0112644

*(I.R.S. Employer
Identification No.)*

133 Boston Post Road, Weston, MA 02493

(781) 464-2000

*(Address, including zip code, and telephone number, including
area code, of registrant's principal executive offices)*

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days: Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files): Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act (Check One):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act): Yes No

The number of shares of the issuer's Common Stock, \$0.0005 par value, outstanding as of October 21, 2013, was 236,212,930 shares.

NOTE REGARDING FORWARD-LOOKING STATEMENTS

This report contains forward-looking statements that are based on our current beliefs and expectations. The following cautionary statements are being made pursuant to the provisions of the Private Securities Litigation Reform Act of 1995 (the “Act”) with the intention of obtaining the benefits of the “Safe Harbor” provisions of the Act. These forward-looking statements may be accompanied by such words as “anticipate,” “believe,” “could,” “estimate,” “expect,” “forecast,” “intend,” “may,” “plan,” “potential,” “project,” “target,” “will” and other words and terms of similar meaning. Reference is made in particular to forward-looking statements regarding:

- the anticipated amount, timing and accounting of revenues, contingency payments, milestone, royalty and other payments under licensing, collaboration or acquisition agreements, tax positions and contingencies, doubtful accounts, cost of sales, research and development costs, compensation and other expenses, amortization of intangible assets, and foreign currency forward contracts;
- the impact of the commercial launch of TECFIDERA in the U.S. on sales and market share of our products, and the potential approval and launch of TECFIDERA in Europe;
- patent terms, patent term extensions, patent office actions, data protection and market exclusivity rights;
- the potential impact of increased product competition in the multiple sclerosis (MS) market, including competition from and growth of our own products and the possibility of future competition from biosimilars, generic versions or related prodrug derivatives;
- our plans to develop further risk stratification protocols for TYSABRI and the impact of such protocols;
- the timing, outcome and impact of administrative, regulatory, litigation and other proceedings related to: patents and other proprietary and intellectual property rights; tax audits, assessments and settlements; product liability and other matters;
- the costs to be incurred in connection with Genentech's arbitration with Hoechst;
- the expected timing and financial impact of the final approval of the settlement of our dispute with the Italian National Medicines Agency relating to sales of TYSABRI;
- the costs, timing, potential approval and therapeutic scope of the development and commercialization of our pipeline products;
- our expectation to exercise our put option requiring Knopp Neurosciences, Inc. (Knopp) to purchase our Class B common share ownership in Knopp;
- the potential impact of budget cuts and other measures in the U.S. and worldwide designed to reduce healthcare costs to constrain the overall level of government expenditures, including the impact of pricing actions in Europe and elsewhere;
- the impact of the continued uncertainty and deterioration of the credit and economic conditions in certain countries in Europe and our collection of accounts receivable in such countries;
- our ability to finance our operations and business initiatives and obtain funding for such activities;
- the impact of new laws and accounting standards;
- the timing and expected financial impact of relocating our corporate headquarters in Weston, Massachusetts to Cambridge, Massachusetts; and
- the drivers for growing our business, including our plans to pursue business development and research opportunities, and competitive conditions.

These forward-looking statements involve risks and uncertainties, including those that are described in the “*Risk Factors*” section of this report and elsewhere within this report that could cause actual results to differ materially from those reflected in such statements. You should not place undue reliance on these statements. Forward-looking statements speak only as of the date of this report. We do not undertake any obligation to publicly update any forward-looking statements.

NOTE REGARDING COMPANY AND PRODUCT REFERENCES

Throughout this report, “Biogen Idec,” the “Company,” “we,” “us” and “our” refer to Biogen Idec Inc. and its consolidated subsidiaries. References to “RITUXAN” refer to both RITUXAN (the trade name for rituximab in the U.S., Canada and Japan) and MabThera (the trade name for rituximab outside the U.S., Canada and Japan), and “ANGIOMAX” refers to both ANGIOMAX (the trade name for bivalirudin in the U.S., Canada and Latin America) and ANGIOX (the trade name for bivalirudin in Europe).

NOTE REGARDING TRADEMARKS

AVONEX[®], AVONEX PEN[®], RITUXAN[®], TECFIDERA[®] and TYSABRI[®] are registered trademarks of Biogen Idec. ALPROLIX[™], ELOCTATE[™], FUMADERM[™] and PLEGRIDY[™] are trademarks of Biogen Idec. The following are trademarks of the respective companies listed: ANGIOMAX[®] and ANGIOX[™] — The Medicines Company; ARZERRA[®] — Glaxo Group Limited; BENLYSTA[®] — Human Genome Sciences, Inc.; BETASERON[®] — Bayer Schering Pharma AG; EXTAVIA[®] — Novartis AG; FAMPYRA[®] — Acorda Therapeutics, Inc.; and REBIF[®] — Ares Trading S.A.

BIOGEN IDEC INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

1. Business

Overview

Biogen Idec is a global biotechnology company focused on discovering, developing, manufacturing and marketing therapies for the treatment of multiple sclerosis and other autoimmune disorders, neurodegenerative diseases and hemophilia. We also collaborate on the development and commercialization of RITUXAN and anti-CD20 product candidates for the treatment of non-Hodgkin's lymphoma and other conditions.

Basis of Presentation

In the opinion of management, the accompanying unaudited condensed consolidated financial statements include all adjustments, consisting of normal recurring accruals, necessary for a fair presentation of our financial statements for interim periods in accordance with accounting principles generally accepted in the United States (U.S. GAAP). The information included in this quarterly report on Form 10-Q should be read in conjunction with our consolidated financial statements and the accompanying notes included in our Annual Report on Form 10-K for the year ended December 31, 2012 (2012 Form 10-K). Our accounting policies are described in the "Notes to Consolidated Financial Statements" in our 2012 Form 10-K and updated, as necessary, in this Form 10-Q. The year-end condensed consolidated balance sheet data presented for comparative purposes was derived from our audited financial statements, but does not include all disclosures required by U.S. GAAP. The results of operations for the three and nine months ended September 30, 2013 are not necessarily indicative of the operating results for the full year or for any other subsequent interim period.

Consolidation

Our condensed consolidated financial statements reflect our financial statements, those of our wholly-owned subsidiaries and those of certain variable interest entities where we are the primary beneficiary. For consolidated entities where we own or are exposed to less than 100% of the economics, we record net income (loss) attributable to noncontrolling interests in our condensed consolidated statements of income equal to the percentage of the economic or ownership interest retained in such entities by the respective noncontrolling parties. Intercompany balances and transactions are eliminated in consolidation.

In determining whether we are the primary beneficiary of an entity and therefore required to consolidate, we apply a qualitative approach that determines whether we have both (1) the power to direct the economically significant activities of the entity and (2) the obligation to absorb losses of, or the right to receive benefits from, the entity that could potentially be significant to that entity. These considerations impact the way we account for our existing collaborative relationships and other arrangements. We continuously assess whether we are the primary beneficiary of a variable interest entity as changes to existing relationships or future transactions may result in us consolidating or deconsolidating our partner(s) to collaborations and other arrangements.

Use of Estimates

The preparation of our condensed consolidated financial statements requires us to make estimates, judgments, and assumptions that may affect the reported amounts of assets, liabilities, equity, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, we evaluate our estimates and judgments and methodologies. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable, the results of which form the basis for making judgments about the carrying values of assets and liabilities. Actual results may differ from these estimates under different assumptions or conditions.

BIOGEN IDEC INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited, continued)

2. Acquisitions

TYSABRI

On April 2, 2013, we acquired full ownership of, and strategic, commercial and decision-making rights to, TYSABRI from Elan Pharma International, Ltd (Elan), an affiliate of Elan Corporation, plc. Upon the closing of the transaction, we made an upfront payment of \$3.25 billion to Elan, which was funded from our existing cash, and our collaboration agreement with Elan was terminated.

We are accounting for this transaction as the acquisition of an asset as we did not acquire any employees from Elan nor did we acquire any significant processes that we did not previously perform or manage under the collaboration agreement. Under the collaboration agreement, we manufactured TYSABRI and collaborated with Elan on the product's marketing, commercial, regulatory, distribution and ongoing development activities. The collaboration agreement was designed to effect an equal sharing of worldwide profits and losses generated by the activities of the collaboration. For additional information related to this collaboration, please read Note 21, *Collaborative and Other Relationships* to our consolidated financial statements included within our 2012 Form 10-K.

The \$3.25 billion upfront payment was capitalized in the second quarter of 2013 as an intangible asset within our condensed consolidated balance sheet as TYSABRI has reached technological feasibility. We adjusted the value of this intangible asset by \$84.4 million related to deferred revenue from two sales-based milestones previously paid by Elan as well as transaction costs. The net intangible asset capitalized was \$3,178.3 million. Commencing in the second quarter of 2013, we began amortizing this intangible asset over the estimated useful life of 17 years using an economic consumption method based on actual and expected revenue generated from the sales of our TYSABRI product.

Following the April 2, 2013 closing of the transaction, we began recording 100% of U.S. revenues, cost of sales and operating expenses related to TYSABRI within our condensed consolidated statements of income. Under the terms of the acquisition agreement, we continued to share TYSABRI profits with Elan on an equal basis until April 30, 2013. We recorded this profit split for the month ended April 30, 2013 as cost of sales within our condensed consolidated statements of income as we controlled TYSABRI effective April 2, 2013. Commencing May 1, 2013 and for the first twelve months thereafter, we will make contingent payments to Elan of 12% on worldwide net sales of TYSABRI and, thereafter, 18% on annual worldwide net sales up to \$2.0 billion and 25% on annual worldwide net sales that exceed \$2.0 billion. In 2014, the \$2.0 billion threshold will be pro-rated for the portion of 2014 remaining after the first 12 months expires. Royalty payments to Elan will be recognized as cost of sales within our condensed consolidated statements of income.

3. Accounts Receivable

Our accounts receivable primarily arise from product sales in the U.S. and Europe and mainly represent amounts due from our wholesale distributors, public hospitals and other government entities. Concentrations of credit risk with respect to our accounts receivable, which are typically unsecured, are limited due to the wide variety of customers and markets using our products, as well as their dispersion across many different geographic areas. The majority of our accounts receivable have standard payment terms which generally require payment within 30 to 90 days. We monitor the financial performance and credit worthiness of our large customers so that we can properly assess and respond to changes in their credit profile. We provide reserves against trade receivables for estimated losses that may result from a customer's inability to pay. Amounts determined to be uncollectible are charged or written-off against the reserve. To date, our historical write-offs of accounts receivable have not been significant.

The credit and economic conditions within Italy, Spain and Portugal, among other members of the European Union, remain uncertain. Uncertain credit and economic conditions have generally led to a lengthening of time to collect our accounts receivable in some of these countries. In some regions in these countries where our collections have slowed and a significant portion of these receivables are routinely being collected over periods in excess of one year, we have discounted our receivables and reduced related revenues based on the period of time that we estimate those amounts will be paid, to the extent such period exceeds one year, using the country's market-based borrowing rate for such period. The related receivables are classified at the time of sale as long-term assets. We accrete interest income on these receivables, which is recognized as a component of other income (expense), net within our condensed consolidated statements of income.

BIOGEN IDEC INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited, continued)

Our net accounts receivable balances from product sales in selected European countries are summarized as follows:

(In millions)	As of September 30, 2013		
	Current Balance Included within Accounts Receivable, net	Non-Current Balance Included within Investments and Other Assets	Total
Spain	\$ 94.1	\$ 18.2	\$ 112.3
Italy	\$ 89.2	\$ 2.5	\$ 91.7
Portugal	\$ 12.5	\$ 18.1	\$ 30.6

(In millions)	As of December 31, 2012		
	Current Balance Included within Accounts Receivable, net	Non-Current Balance Included within Investments and Other Assets	Total
Spain	\$ 78.9	\$ —	\$ 78.9
Italy	\$ 94.4	\$ 10.2	\$ 104.6
Portugal	\$ 16.6	\$ 7.4	\$ 24.0

Approximately \$40.8 million and \$11.8 million of the total net accounts receivable balances for these countries were overdue more than one year as of September 30, 2013 and December 31, 2012, respectively.

Pricing of TYSABRI in Italy - AIFA

In the fourth quarter of 2011, Biogen Idec SRL, our Italian subsidiary, received a notice from the Italian National Medicines Agency (AIFA) stating that sales of TYSABRI for the period from February 2009 through February 2011 exceeded by EUR30.7 million a reimbursement limit established pursuant to a Price Determination Resolution (Price Resolution) granted by AIFA in December 2006. In December 2011, based on our interpretation that the Price Resolution by its terms only applied to the first 24 months of TYSABRI sales (which began in February 2007), we filed an appeal against AIFA in administrative court seeking a ruling that the reimbursement limit does not apply and that the position of AIFA is unenforceable. That appeal is pending.

In June 2013, Biogen Idec SRL received an additional notice from AIFA, stating that sales of TYSABRI from February 2011 through February 2013 also exceeded the same reimbursement limit in the Price Resolution. We dispute that the reimbursement limit applies to this period for the same reason that we dispute its application to the February 2009 through February 2011 period.

In July 2013, we reached an agreement in principle with the Price and Reimbursement Committee of AIFA to settle all of AIFA's existing claims relating to sales of TYSABRI in excess of the reimbursement limit for the periods between February 2009 through February 2013 for an aggregate repayment of EUR33.3 million. As part of this settlement, we also agreed that the reimbursement limit in the Pricing Resolution will no longer be in effect as of February 2013. The settlement is pending approval by the Italy Avvocatura Generale dello Stato and the board of directors of AIFA. Upon this approval and the execution of the settlement, we will dismiss our appeal.

As a result of this agreement, we recorded a liability and reduction to revenue of EUR15.4 million. That adjustment approximates 50% of the claim related to the period from February 2009 through February 2011 for which we had not recorded any amounts. We recorded the adjustment as of June 30, 2013 as the likelihood of making a payment to settle AIFA's claims for this period was now probable and the amount could be estimated.

Since being notified in the fourth quarter of 2011 that AIFA believed a reimbursement limit was in effect, we have deferred revenue on sales of TYSABRI as if the reimbursement limit were in effect. As of September 30, 2013, we have deferred an aggregate amount of \$120.7 million, of which \$12.7 million and \$39.9 million were deferred during the three and nine months ended September 30, 2013, respectively. We will continue to defer revenue until the settlement is approved. Upon approval of the settlement, any deferred revenue related to the periods subsequent to February 2011 that is in excess of the settlement will be recognized as revenue. At the time of sale, our net accounts receivable balances from product sales in Italy include the amount of deferred revenue discussed above as our customers pay the invoice price of the product. For additional information, please read Note 20, *Litigation* to these condensed consolidated financial statements.

4. Reserves for Discounts and Allowances

As a result of our acquisition of TYSABRI rights from Elan, we began recognizing reserves for discounts and allowances for U.S. TYSABRI revenue in the second quarter of 2013. Prior periods included reserves for discounts and allowances for rest of world TYSABRI revenue and worldwide AVONEX revenue only. In addition, following our start of U.S. commercial sales of TECFIDERA in the second quarter of 2013, we began recognizing reserves for discounts and allowances related to U.S. TECFIDERA revenue.

An analysis of the change in reserves is summarized as follows:

(In millions)	Discounts	Contractual Adjustments	Returns	Total
Balance, as of December 31, 2012	\$ 15.5	\$ 194.8	\$ 26.8	\$ 237.1
Current provisions relating to sales in current year	202.9	549.8	16.0	768.7
Adjustments relating to prior years	(0.8)	(7.8)	0.9	(7.7)
Payments/returns relating to sales in current year	(145.3)	(306.1)	—	(451.4)
Payments/returns relating to sales in prior years	(13.8)	(127.8)	(13.9)	(155.5)
Balance, as of September 30, 2013	<u>\$ 58.5</u>	<u>\$ 302.9</u>	<u>\$ 29.8</u>	<u>\$ 391.2</u>

The total reserves above, included in our condensed consolidated balance sheets, are summarized as follows:

(In millions)	As of September 30, 2013	As of December 31, 2012
Reduction of accounts receivable	\$ 143.8	\$ 46.1
Component of accrued expenses and other	247.4	191.0
Total reserves	<u>\$ 391.2</u>	<u>\$ 237.1</u>

5. Inventory

The components of inventory are summarized as follows:

(In millions)	As of September 30, 2013	As of December 31, 2012
Raw materials	\$ 112.2	\$ 101.8
Work in process	389.8	230.5
Finished goods	112.5	115.1
Total inventory	<u>\$ 614.5</u>	<u>\$ 447.4</u>

As of September 30, 2013, our inventory includes \$82.4 million associated with our ELOCTATE, ALPROLIX, Serum-Free AVONEX and PLEGRIDY programs, which have been capitalized in advance of regulatory approval.

BIOPEN IDEC INC. AND SUBSIDIARIES

(unaudited, continued)

6. Intangible Assets and Goodwill

Intangible Assets

Intangible assets, net of accumulated amortization, impairment charges and adjustments, are summarized as follows:

(In millions)	Estimated Life	As of September 30, 2013			As of December 31, 2012		
		Cost	Accumulated Amortization	Net	Cost	Accumulated Amortization	Net
Out-licensed patents	13-23 years	\$ 578.0	\$ (443.3)	\$ 134.7	\$ 578.0	\$ (421.0)	\$ 157.0
AVONEX Core developed technology	15-23 years	3,005.3	(2,107.0)	898.3	3,005.3	(1,965.7)	1,039.6
In-process research and development	Up to 15 years upon commercialization	327.4	—	327.4	330.1	—	330.1
Trademarks and tradenames	Indefinite	64.0	—	64.0	64.0	—	64.0
Acquired and in-licensed rights and patents	6-17 years	3,236.1	(80.3)	3,155.8	53.7	(12.9)	40.8
Total intangible assets		<u>\$ 7,210.8</u>	<u>\$ (2,630.6)</u>	<u>\$ 4,580.2</u>	<u>\$ 4,031.1</u>	<u>\$ (2,399.6)</u>	<u>\$ 1,631.5</u>

For the three and nine months ended September 30, 2013, amortization of acquired intangible assets totaled \$100.0 million and \$233.5 million, respectively, as compared to \$53.0 million and \$151.3 million, respectively, in the prior year comparative periods. The increase in amortization for the three and nine months ended September 30, 2013 was primarily driven by amortization recorded in relation to the intangible asset recorded upon our acquisition of TYSABRI rights and the amount of amortization recorded in relation to our AVONEX core technology asset. Amortization of acquired intangible assets for the nine months ended September 30, 2013 also includes a charge of \$2.6 million related to a write down in carrying value of one of our in-process research and development assets to reflect a change in its estimated fair value.

AVONEX Core Developed Technology

Core developed technology primarily relates to our AVONEX product, which was recorded in connection with the merger of Biogen, Inc. and IDEC Pharmaceuticals Corporation in 2003. The net book value of this asset as of September 30, 2013 was \$887.9 million. We amortize this intangible asset using the economic consumption method based on revenue generated from our AVONEX product. An analysis of the anticipated lifetime revenue of AVONEX is performed annually during our long range planning cycle each year. This analysis serves as the basis for the calculation of economic consumption for the AVONEX core technology asset.

Acquired and In-licensed Rights and Patents

The increase in acquired and in-licensed rights and patents during the three and nine months ended September 30, 2013, as compared to the same periods in 2012, was primarily related to the \$3,178.3 million intangible asset capitalized in connection with our acquisition of TYSABRI rights from Elan on April 2, 2013. In the second quarter of 2013, we began amortizing this intangible asset over the estimated useful life using an economic consumption method based on actual and expected revenue generated from the sales of our TYSABRI product. For a more detailed description of this transaction, please read Note 2, *Acquisitions* to these condensed consolidated financial statements.

BIOGEN IDEC INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited, continued)

Estimated Future Amortization of Intangible Assets

Our most recent long range planning cycle was completed in the third quarter of 2013, which reflected a decrease in the expected future product revenues of AVONEX and TYSABRI, resulting in an increase in amortization expense as compared to prior quarters. The results of our analysis were most significantly impacted by changes in the estimated impact of TECFIDERA, as well as other oral and alternative formulations including PLEGRIDY that may compete with AVONEX and TYSABRI. Based upon this more recent analysis, the estimated future amortization for acquired intangible assets is expected to be as follows:

(In millions)	As of September 30, 2013	
	2013 (remaining three months) \$	113.2
	2014	418.9
	2015	337.4
	2016	323.4
	2017	328.1
	2018	330.7
Total	\$	<u>1,851.7</u>

Goodwill

The following table provides a roll-forward of the changes in our goodwill balance:

(In millions)	As of September 30, 2013	As of December 31, 2012
Goodwill, beginning of period	\$ 1,201.3	\$ 1,146.3
Goodwill acquired during the period	13.5	48.2
Other	(4.1)	6.8
Goodwill, end of period	<u>\$ 1,210.7</u>	<u>\$ 1,201.3</u>

The increase in goodwill during the nine months ended September 30, 2013 was primarily related to the \$15.0 million contingent payment made to former shareholders of Fumapharm AG (net of \$1.5 million tax benefit), which became payable upon the approval of TECFIDERA in the U.S. For additional information related to future contingent payments, please read Note 21, *Commitments and Contingencies* to these condensed consolidated financial statements.

For the nine months ended September 30, 2013, we adjusted goodwill to establish a deferred tax asset related to our Stromedix Inc. (Stromedix) transaction. For additional information related to our transaction with Stromedix, please read Note 2, *Acquisitions* to our consolidated financial statements included within our 2012 Form 10-K.

As of September 30, 2013, we had no accumulated impairment losses related to goodwill.

Total	\$ 3,656.5	\$ 9.0	\$ 3,627.2	\$ 20.3
Liabilities:				
Derivative contracts	\$ 14.4	\$ —	\$ 14.4	\$ —
Contingent consideration obligations	293.9	—	—	293.9
Total	\$ 308.3	\$ —	\$ 14.4	\$ 293.9

There have been no impairments of our assets measured and carried at fair value during the three and nine months ended September 30, 2013. In addition, there were no changes in valuation techniques or inputs utilized or transfers between fair value measurement levels during the three and nine months ended September 30, 2013. The fair value of Level 2 instruments classified as cash equivalents and marketable debt securities were determined through valuation models of third party pricing services. For a description of our validation procedures related to prices provided by third party pricing services, refer to Note 1, *Summary of Significant Accounting Policies: Fair Value Measurements*, to our consolidated financial statements included within our 2012 Form 10-K.

BIOGEN IDEC INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited, continued)

Marketable Equity Securities and Venture Capital Investments

Our marketable equity securities represent investments in publicly traded equity securities. Our venture capital investments, which are Level 3 measurements, include investments in certain venture capital funds, accounted for at fair value, that primarily invest in small privately-owned, venture-backed biotechnology companies. These venture capital investments represented approximately 0.2% of total assets as of September 30, 2013 and December 31, 2012, respectively.

The following table provides a roll-forward of the fair value of our venture capital investments that are Level 3 assets:

(In millions)	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2013	2012	2013	2012
Fair value, beginning of period	\$ 23.5	\$ 25.4	\$ 20.3	\$ 23.5
Unrealized gains included in earnings	3.8	1.4	10.5	4.9
Unrealized losses included in earnings	—	(1.6)	(2.0)	(3.6)
Purchases	0.3	—	0.3	0.4
Settlements	—	—	(1.5)	—
Fair value, end of period	<u>\$ 27.6</u>	<u>\$ 25.2</u>	<u>\$ 27.6</u>	<u>\$ 25.2</u>

Debt Instruments

The fair and carrying values of our debt instruments, which are Level 2 liabilities, are summarized as follows:

(In millions)	As of September 30, 2013		As of December 31, 2012	
	Fair Value	Carrying Value	Fair Value	Carrying Value
Notes payable to Fumedica	\$ 16.8	\$ 15.3	\$ 20.0	\$ 17.9
Credit facility	—	—	—	—
6.0% Senior Notes due March 1, 2013	—	—	453.7	450.0
6.875% Senior Notes due March 1, 2018	649.5	581.7	681.6	586.4
Total	<u>\$ 666.3</u>	<u>\$ 597.0</u>	<u>\$ 1,155.3</u>	<u>\$ 1,054.3</u>

The fair value of our notes payable to Fumedica was estimated using market observable inputs, including current interest and foreign currency exchange rates. The fair value of our 6.875% Senior Notes was determined through market, observable, and corroborated sources. For additional information related to our debt instruments, please read Note 11, *Indebtedness* to these condensed consolidated financial statements.

Contingent Consideration Obligations

The following table provides a roll-forward of the fair values of our contingent consideration obligations which includes Level 3 measurements:

(In millions)	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2013	2012	2013	2012
Fair value, beginning of period	\$ 281.0	\$ 280.9	\$ 293.9	\$ 151.0
Additions	—	—	—	122.2
Changes in fair value	(0.1)	9.5	(3.0)	23.6
Payments	0.1	—	(9.9)	(6.5)
Fair value, end of period	<u>\$ 281.0</u>	<u>\$ 290.3</u>	<u>\$ 281.0</u>	<u>\$ 290.3</u>

As of September 30, 2013 and December 31, 2012, approximately \$251.9 million and \$271.5 million, respectively, of the fair value of our total contingent consideration obligations were reflected as components of other long-term liabilities within our condensed consolidated balance sheets with the remaining balances reflected as a component of accrued expenses and other.

Summary of Contractual Maturities: Available-for-Sale Securities

The estimated fair value and amortized cost of our marketable debt securities available-for-sale by contractual maturity are summarized as follows:

(In millions)	As of September 30, 2013		As of December 31, 2012	
	Estimated Fair Value	Amortized Cost	Estimated Fair Value	Amortized Cost
Due in one year or less	\$ 240.9	\$ 240.9	\$ 1,135.0	\$ 1,134.5
Due after one year through five years	351.8	351.6	1,744.3	1,741.2
Due after five years	21.7	21.9	292.4	292.3
Total available-for-sale securities	<u>\$ 614.4</u>	<u>\$ 614.4</u>	<u>\$ 3,171.7</u>	<u>\$ 3,168.0</u>

The average maturity of our marketable debt securities available-for-sale as of September 30, 2013 and December 31, 2012 was 14 months, respectively.

Proceeds from Marketable Debt Securities

The proceeds from maturities and sales of marketable debt securities and resulting realized gains and losses are summarized as follows:

(In millions)	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2013	2012	2013	2012
Proceeds from maturities and sales	\$ 617.5	\$ 491.3	\$ 5,025.2	\$ 1,913.4
Realized gains	\$ 0.2	\$ 0.4	\$ 6.6	\$ 1.7
Realized losses	\$ —	\$ (0.8)	\$ (2.1)	\$ (2.7)

Strategic Investments

As of September 30, 2013 and December 31, 2012, our strategic investment portfolio was comprised of investments totaling \$93.0 million and \$64.2 million, respectively, which are included in investments and other assets in our accompanying condensed consolidated balance sheets.

Our strategic investment portfolio includes investments in marketable equity securities of certain biotechnology companies and our investments in venture capital funds accounted for at fair value which totaled \$68.0 million and \$29.3 million as of September 30, 2013 and December 31, 2012, respectively. Our strategic investment portfolio also includes other equity investments in privately-held companies and additional investments in venture capital funds accounted for under the cost method. The carrying value of these investments totaled \$25.0 million and \$34.9 million as of September 30, 2013 and December 31, 2012, respectively.

Net Gains, Impairments and Changes to Fair Value

During the three and nine months ended September 30, 2013, we realized net gains, impairments and changes to fair value recorded through income, of \$3.8 million and \$7.9 million, respectively, on our strategic investment portfolio as compared to net losses of \$1.8 million and net gains of \$11.7 million, respectively, in the prior year comparative periods. The net gains recognized during the prior year nine months included a gain of \$9.0 million recognized upon our acquisition of Stromedix in which we previously held an equity interest. For a more detailed description of this transaction, please read Note 2, *Acquisitions* to our consolidated financial statements included within our 2012 Form 10-K.

Impairments

For the three and nine months ended September 30, 2013, we recognized impairment charges on our marketable equity securities of certain biotechnology companies, investments in venture capital funds accounted for under the cost method and investments in privately-held companies totaling \$0.0 million and \$1.7 million, respectively, as compared to \$3.5 million and \$4.8 million, respectively, in the prior year comparative periods.

BIOGEN IDEC INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited, continued)

9. Derivative Instruments

Foreign Currency Forward Contracts - Hedging Instruments

Due to the global nature of our operations, portions of our revenues are earned in currencies other than the U.S. dollar. The value of revenues measured in U.S. dollars is therefore subject to changes in foreign currency exchange rates. In order to mitigate these changes we use foreign currency forward contracts to lock in exchange rates associated with a portion of our forecasted international revenues.

Foreign currency forward contracts in effect as of September 30, 2013 and December 31, 2012 had durations of 1 to 15 months and 1 to 12 months, respectively. These contracts have been designated as cash flow hedges and accordingly, to the extent effective, any unrealized gains or losses on these foreign currency forward contracts are reported in accumulated other comprehensive income (loss) (referred to as AOCI in the tables below). Realized gains and losses for the effective portion of such contracts are recognized in revenue when the sale of product in the currency being hedged is recognized. To the extent ineffective, hedge transaction gains and losses are reported in other income (expense), net.

The notional value of foreign currency forward contracts that were entered into to hedge forecasted revenues is summarized as follows:

Foreign Currency: (In millions)	Notional Amount	
	As of September 30, 2013	As of December 31, 2012
Euro	\$ 570.0	\$ 492.2
Canadian dollar	10.6	31.8
Total foreign currency forward contracts	\$ 580.6	\$ 524.0

The portion of the fair value of these foreign currency forward contracts that was included in accumulated other comprehensive income (loss) within total equity reflected losses of \$16.2 million and \$11.8 million as of September 30, 2013 and December 31, 2012, respectively. We expect all contracts to be settled over the next 15 months and any amounts in accumulated other comprehensive income (loss) to be reported as an adjustment to revenue. We consider the impact of our and our counterparties' credit risk on the fair value of the contracts as well as the ability of each party to execute its contractual obligations. As of September 30, 2013 and December 31, 2012, respectively, credit risk did not materially change the fair value of our foreign currency forward contracts.

The following table summarizes the effect of derivatives designated as hedging instruments on our condensed consolidated statements of income:

For the Three Months Ended September 30,					
Location	Net Gains/(Losses) Reclassified from AOCI into Net Income (Effective Portion)		Location	Net Gains/(Losses) Recognized into Net Income (Ineffective Portion)	
	2013	2012		2013	2012
Revenue	\$ (7.3)	\$ 12.0	Other income (expense)	\$ (0.1)	\$ 0.8

For the Nine Months Ended September 30,					
Location	Net Gains/(Losses) Reclassified from AOCI into Net Income (Effective Portion)		Location	Net Gains/(Losses) Recognized into Net Income (Ineffective Portion)	
	2013	2012		2013	2012
Revenue	\$ (6.1)	\$ 31.0	Other income (expense)	\$ 0.2	\$ 4.0

We recognized in product revenue net losses of \$7.3 million and \$6.1 million for the settlement of certain effective cash flow hedge instruments for the three and nine months ended September 30, 2013, respectively, as compared to net gains of \$12.0 million and \$31.0 million, respectively, in the prior year comparative periods. These settlements were recorded in the same period as the related revenues were generated.

BIOGEN IDEC INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited, continued)

In relation to our foreign currency forward contracts, due to hedge ineffectiveness, we recognized in other income (expense) a net loss of \$0.1 million and a net gain of \$0.2 million for the three and nine months ended September 30, 2013, respectively, as compared to net gains of \$0.8 million and \$4.0 million, respectively, in the prior year comparative periods.

Foreign Currency Forward Contracts - Other Derivatives

We also enter into other foreign currency forward contracts, usually with one month durations, to mitigate the foreign currency risk related to certain balance sheet positions. We have not elected hedge accounting for these transactions.

The aggregate notional amount of these other outstanding foreign currency contracts was \$176.7 million and \$243.2 million as of September 30, 2013 and December 31, 2012, respectively. A net loss of \$0.2 million and a net gain of \$1.3 million related to these contracts were recognized as a component of other income (expense), net, for the three and nine months ended September 30, 2013, respectively, as compared to a net loss of \$5.7 million and a net gain of \$5.6 million, respectively, in the prior year comparative periods.

Summary of Derivatives

While certain of our derivatives are subject to netting arrangements with our counterparties, we do not offset derivative assets and liabilities within our condensed consolidated balance sheets.

The following table summarizes the fair value and presentation in our condensed consolidated balance sheets for our outstanding derivatives including those designated as hedging instruments:

(In millions)	Balance Sheet Location	Fair Value As of September 30, 2013	
<i>Hedging Instruments:</i>			
Asset derivatives	Other current assets	\$	0.4
Liability derivatives	Accrued expenses and other	\$	15.4
<i>Other Derivatives:</i>			
Asset derivatives	Other current assets	\$	1.4
Liability derivatives	Accrued expenses and other	\$	1.7

BIOGEN IDEC INC. AND SUBSIDIARIES
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited, continued)

10. Property, Plant and Equipment

Property, plant and equipment are recorded at historical cost, net of accumulated depreciation. Accumulated depreciation on property, plant and equipment was \$1,074.0 million and \$941.1 million as of September 30, 2013 and December 31, 2012, respectively.

For the three and nine months ended September 30, 2013, we capitalized interest costs related to construction in progress totaling approximately \$2.2 million and \$5.7 million, respectively, as compared to \$6.6 million and \$23.4 million, respectively, in the prior year comparative periods.

Cambridge Leases

In July 2011, we executed leases for two office buildings to be constructed in Cambridge, Massachusetts with a planned occupancy during the second half of 2013. Construction of these facilities began in late 2011. In accordance with accounting guidance applicable to entities involved with the construction of an asset that will be leased when the construction is completed, we are considered the owner of these properties during the construction period. Accordingly, we recorded an asset along with a corresponding financing obligation on our condensed consolidated balance sheet for the amount of total project costs incurred related to the construction in progress for these buildings.

In July 2013, the construction of one of the two buildings was completed and we started leasing the facility. Upon completion of the construction of the building, we determined as part of a normal process that we are no longer considered the owner of that building because we do not have any unusual or significant continuing involvement. Consequently, we derecognized the building and its associated financing obligation of approximately \$47.7 million from our condensed consolidated balance sheet. The derecognition of the building and its associated financing obligation constitute non-cash investing and financing transactions in the amount of \$47.7 million. Upon completion of the second building, we will perform a similar assessment and determine if the remaining asset and corresponding financing obligation should also be derecognized. As of September 30, 2013 and December 31, 2012, the amounts recorded within our condensed consolidated balance sheet as property, plant and equipment and financing obligation totaled approximately \$101.3 million and \$86.5 million, respectively.

As a result of our decision to relocate our corporate headquarters to Cambridge, Massachusetts, we expect to vacate part of our Weston, Massachusetts facility in the fourth quarter of 2013. We expect to incur a charge of approximately \$25.0 million in connection with this process. This estimate represents our remaining lease obligation for the vacated portion of our Weston facility, net of sublease income to be received. We will begin to sublease the vacated portion of our Weston facility in the first half of 2014 for the remaining term of our lease agreement.

Hillerød, Denmark Facility

As of September 2012, our large-scale biologics manufacturing facility in Hillerød, Denmark was ready for its intended use as we began the process of manufacturing clinical products for sale to third parties. As a result, we transferred \$465.9 million from construction in progress to various fixed asset accounts. We ceased capitalizing a majority of the interest expense and began recording depreciation on the various assets during the third quarter of 2012. The average estimated useful life for the facility and its assets is 20 years. In July 2013, the facility was approved by the U.S. Food and Drug Administration (FDA) and European Medicines Agency (EMA) for the manufacture of commercial TYSABRI.

Research Triangle Park (RTP) Lease

In December 2012, we entered into an arrangement with Eisai, Inc. (Eisai) to lease a portion of their facility in RTP to manufacture our and Eisai's oral solid dose products and for Eisai to provide us with vial-filling services for biologic therapies and packaging services for oral solid dose products. The 10 year operating lease agreement, which is cancellable after 5 years, became effective in February 2013 and gives us the option to purchase the facility.

BIOGEN IDEC INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited, continued)

11. Indebtedness

Credit Facility

In March 2013, we entered into a \$750.0 million senior unsecured revolving credit facility, which we may choose to use for working capital and general corporate purposes. The terms of this revolving credit facility include a financial covenant that requires us to not exceed a maximum debt to EBITDA ratio. This facility terminates in March 2014. As of September 30, 2013, we had no outstanding borrowings and were in compliance with all covenants under this facility.

Senior Notes

On March 1, 2013, we repaid the \$450.0 million principal amount of our 6.0% Senior Notes.

12. Equity

Total equity as of September 30, 2013 increased \$1,161.9 million compared to December 31, 2012. This increase was primarily driven by net income attributable to Biogen Idec Inc. of \$1,405.0 million and an increase in additional paid in capital resulting from our share-based compensation arrangements totaling \$132.9 million, partially offset by repurchases of our common stock totaling \$400.3 million.

Share Repurchases

In February 2011, our Board of Directors authorized the repurchase of up to 20.0 million shares of common stock. This authorization does not have an expiration date. During the nine months ended September 30, 2013, we repurchased approximately 2.0 million shares at a cost of \$400.3 million. Of those shares, 1.7 million were repurchased during the three months ended September 30, 2013 at a cost of \$359.3 million. During the nine months ended September 30, 2012, we repurchased approximately 7.7 million shares at a cost of approximately \$963.2 million.

Approximately 4.2 million shares of our common stock remain available for repurchase under the 2011 authorization.

Noncontrolling Interests

The following table reconciles equity attributable to noncontrolling interests:

(In millions)	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2013	2012	2013	2012
Noncontrolling interests, beginning of period	\$ 0.6	\$ 2.4	\$ 2.3	\$ 1.5
Net income attributable to noncontrolling interests, net of tax	—	—	—	—
Currency translation adjustment	—	—	—	0.1
Deconsolidation of noncontrolling interest	—	—	(1.7)	(0.5)
Distributions to noncontrolling interests	—	—	—	1.3
Noncontrolling interests, end of period	\$ 0.6	\$ 2.4	\$ 0.6	\$ 2.4

For additional information related to our deconsolidation of noncontrolling interests related to Knopp Neurosciences, Inc. in March 2013, please read Note 18, *Investments in Variable Interest Entities* to these condensed consolidated financial statements.

13. Accumulated Other Comprehensive Income (Loss)

The following table summarizes the changes in accumulated other comprehensive income (loss), net of tax by component:

(In millions)	Unrealized Gains (Losses) on Securities Available for Sale	Unrealized Gains (Losses) on Foreign Currency Forward Contracts	Unfunded Status of Postretirement Benefit Plans	Translation Adjustments	Total
Balance, as of December 31, 2012	\$ 4.2	\$ (10.7)	\$ (21.7)	\$ (27.1)	\$ (55.3)
Other comprehensive income (loss) before reclassifications	14.1	(12.0)	3.2	17.2	22.5
Amounts reclassified from accumulated other comprehensive income (loss)	(2.9)	6.4	—	—	3.5
Net current period other comprehensive income (loss)	11.2	(5.6)	3.2	17.2	26.0
Balance, as of September 30, 2013	\$ 15.4	\$ (16.3)	\$ (18.5)	\$ (9.9)	\$ (29.3)

The following table summarizes the amounts reclassified from accumulated other comprehensive income:

(In millions)	Income Statement Location	Amounts Reclassified from Accumulated Other Comprehensive Income			
		For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
		2013	2012	2013	2012
Gains (losses) on securities available for sale	Other income (expense)	\$ 0.2	\$ (0.3)	\$ 4.5	\$ (1.1)
	Income tax expense	(0.1)	0.1	(1.6)	0.4
Gains (losses) on foreign currency forward contracts	Revenues	(7.3)	12.0	(6.1)	31.0
	Income tax expense	—	—	(0.3)	(1.9)
Total reclassifications, net of tax		\$ (7.2)	\$ 11.8	\$ (3.5)	\$ 28.4

Securities Available for Sale

Balances included within accumulated other comprehensive income (loss) related to unrealized gains (losses) on securities available for sale are shown net of tax of \$9.0 million and \$2.5 million as of September 30, 2013 and December 31, 2012, respectively. Other comprehensive income (loss) before reclassifications recognized during the nine months ended September 30, 2013 are shown net of tax of \$6.6 million.

Foreign Currency Forward Contracts

Balances included within accumulated other comprehensive income (loss) related to unrealized gains (losses) on foreign currency forward contracts are shown net of tax of \$0.1 million and \$1.1 million as of September 30, 2013 and December 31, 2012, respectively. Other comprehensive income (loss) before reclassifications recognized during the nine months ended September 30, 2013 are shown net of tax of \$1.2 million.

Postretirement Benefit Plans

Tax amounts related to the unfunded status of pension and retirement benefit plans were immaterial for all amounts presented.

14. Earnings per Share

Basic and diluted earnings per share are calculated as follows:

(In millions)	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2013	2012	2013	2012
<i>Numerator:</i>				
Net income attributable to Biogen Idec Inc.	\$ 487.6	\$ 398.4	\$ 1,405.0	\$ 1,087.9
<i>Denominator:</i>				
Weighted average number of common shares outstanding	237.1	236.5	237.1	238.3
<i>Effect of dilutive securities:</i>				
Stock options and employee stock purchase plan	0.2	0.4	0.4	0.5
Time-vested restricted stock units	0.7	0.9	0.7	1.0
Market stock units	0.3	0.3	0.3	0.3
Dilutive potential common shares	1.2	1.6	1.4	1.8
Shares used in calculating diluted earnings per share	238.3	238.1	238.5	240.1

Amounts excluded from the calculation of net income per diluted share because their effects were anti-dilutive were insignificant.

15. Share-based Payments*Share-based Compensation Expense*

The following table summarizes share-based compensation expense included within our condensed consolidated statements of income:

(In millions)	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2013	2012	2013	2012
Research and development	\$ 20.7	\$ 18.0	\$ 69.6	\$ 55.8
Selling, general and administrative	39.9	27.7	119.5	81.5
Subtotal	60.6	45.7	189.1	137.3
Capitalized share-based compensation costs	(2.4)	(1.5)	(7.4)	(4.0)
Share-based compensation expense included in total cost and expenses	58.2	44.2	181.7	133.3
Income tax effect	(17.4)	(13.0)	(54.3)	(40.1)
Share-based compensation expense included in net income attributable to Biogen Idec Inc.	\$ 40.8	\$ 31.2	\$ 127.4	\$ 93.2

BIOGEN IDEC INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited, continued)

The following table summarizes share-based compensation expense associated with each of our share-based compensation programs:

(In millions)	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2013	2012	2013	2012
Stock options	\$ 0.1	\$ 0.7	\$ 0.5	\$ 1.6
Market stock units	12.2	5.6	27.2	17.2
Time-vested restricted stock units	25.3	21.4	77.2	69.5
Performance-vested restricted stock units settled in shares	—	—	—	0.1
Cash settled performance shares	20.6	16.4	76.8	45.1
Employee stock purchase plan	2.4	1.6	7.4	3.8
Subtotal	60.6	45.7	189.1	137.3
Capitalized share-based compensation costs	(2.4)	(1.5)	(7.4)	(4.0)
Share-based compensation expense included in total cost and expenses	<u>\$ 58.2</u>	<u>\$ 44.2</u>	<u>\$ 181.7</u>	<u>\$ 133.3</u>

Grants Under Share-based Compensation Plans

The following table summarizes our equity grants to employees, officers and directors under our current stock plans:

	For the Nine Months Ended September 30,	
	2013	2012
Market stock units	268,000	312,000
Cash settled performance shares	273,000	327,000
Time-vested restricted stock units	708,000	902,000

No performance-vested restricted stock units or stock options were granted during the nine months ended September 30, 2013 and 2012. In addition, for the nine months ended September 30, 2013, approximately 208,000 shares were issued under our employee stock purchase plan (ESPP) compared to approximately 225,000 shares issued in the prior year comparative period.

16. Income Taxes

For the three and nine months ended September 30, 2013, our effective tax rate was 27.4% and 22.5%, respectively, as compared to 24.7% and 23.5%, respectively, in the prior year comparative periods.

A reconciliation between the U.S. federal statutory tax rate and our effective tax rate is summarized as follows:

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2013	2012	2013	2012
Statutory rate	35.0 %	35.0 %	35.0 %	35.0 %
State taxes	2.5	0.8	3.7	0.8
Taxes on foreign earnings	(6.6)	(7.1)	(7.7)	(7.6)
Credits and net operating loss utilization	(2.2)	(3.4)	(3.0)	(3.7)
Purchased intangible assets	1.9	1.3	1.6	1.2
Manufacturing deduction	(2.5)	(2.5)	(8.0)	(2.3)
Other permanent items	(0.3)	0.4	1.0	(0.4)
Other	(0.4)	0.2	(0.1)	0.5
Effective tax rate	<u>27.4 %</u>	<u>24.7 %</u>	<u>22.5 %</u>	<u>23.5 %</u>

BIOGEN IDEC INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited, continued)

The increase in our tax rate for the three months ended September 30, 2013 compared to the same period in 2012, is primarily attributable to the commercial launch of TECFIDERA in the United States, which has resulted in a higher relative percentage of our earnings being recognized in the U.S., a higher tax jurisdiction. In addition, in 2013 we are recognizing reduced expenditures eligible for the orphan drug credit and higher state taxes. These factors were partially offset by lower intercompany royalties owed by a foreign wholly owned subsidiary to a U.S. wholly owned subsidiary on the international sales of one of our products.

For the nine months ended September 30, 2013, the reduction in our income tax rate compared to the same period in 2012, was primarily the result of a change in our uncertain tax position related to our U.S. federal manufacturing deduction, described below, lower intercompany royalties owed by a foreign wholly owned subsidiary to a U.S. wholly owned subsidiary on the international sales of one of our products and the reinstatement of the federal research and development tax credit. These favorable items were partially offset by higher relative earnings in the United States from the commercial launch of TECFIDERA, lower orphan drug credits due to reduced expenditures in eligible clinical trials and higher state taxes.

The change in the state taxes, manufacturing deduction and other permanent items of the effective tax rate reconciliation for the periods disclosed in the table above is primarily related to changes in the valuation of our federal uncertain tax positions, as discussed below under "*Accounting for Uncertainty in Income Taxes*".

During the nine months ended September 30, 2013, we recorded a deferred charge of \$203.7 million in connection with an intercompany transfer of the intellectual property for Daclizumab. The deferred charge will be amortized to income tax expense over the economic life of the Daclizumab program. If the Daclizumab program were to be discontinued, we will accelerate the amortization of this deferred charge and record an expense equal to its remaining net book value.

Accounting for Uncertainty in Income Taxes

We and our subsidiaries are routinely examined by various taxing authorities. We file income tax returns in the U.S. federal jurisdiction, various U.S. states, and foreign jurisdictions. With few exceptions, including the proposed disallowance we discuss below, we are no longer subject to U.S. federal tax examination for years before 2010 or state, local, or non-U.S. income tax examinations for years before 2004.

Federal Uncertain Tax Positions

During the three months ended March 31, 2013, we received updated technical guidance from the IRS concerning our current and prior year filings and calculation of our U.S. federal manufacturing deduction related to our unconsolidated joint business. Based on this guidance we reevaluated the level of our unrecognized benefits related to uncertain tax positions, and recorded a \$33.0 million benefit, which is net of ancillary federal and state tax effects. This benefit is for a previously unrecognized position and relates to years 2005 through 2012 and is net of a \$10.0 million expense for non-income based state taxes, which is recorded in other income (expense) within our condensed consolidated statements of income. Subsequent to establishing the uncertain tax position, we have remeasured the uncertain tax position upon receiving new information and recorded a net benefit of approximately \$7.0 million.

In October 2011, in conjunction with our examination, the IRS proposed a disallowance of approximately \$130.0 million in deductions for tax years 2007, 2008 and 2009 related to payments for services provided by our wholly owned Danish subsidiary located in Hillerød, Denmark. We believe that these items represent valid deductible business expenses and are vigorously defending our position.

It is reasonably possible that we will adjust the value of our uncertain tax positions related to the manufacturing deduction as we receive additional information from various taxing authorities. In addition, the IRS routinely examines our intercompany transfer pricing with respect to intellectual property related transactions and it is possible that the IRS may disagree with one or more positions we have taken with respect to such valuations. We do not anticipate any other significant changes in our positions in the next twelve months other than expected settlements which have been classified as current liabilities within the accompanying balance sheet.

BIOGEN IDEC INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited, continued)

State Uncertain Tax Positions

On June 8, 2010, we received Notices of Assessment from the Massachusetts Department of Revenue (DOR) against Biogen Idec MA Inc. (BIMA), one of our wholly-owned subsidiaries, for \$103.5 million of corporate excise tax, including associated interest and penalties, related to our 2004, 2005 and 2006 state tax filings. The assessment asserted that the portion of sales attributable to Massachusetts, the computation of BIMA's research and development credits and certain deductions claimed by BIMA were not appropriate. On February 3, 2013, we filed a petition with the Massachusetts Appellate Tax Board (Massachusetts ATB) appealing the denial of our application for abatement. On October 15, 2013 we reached a settlement with the Massachusetts DOR related to our 2004, 2005 and 2006 state tax filings under which we agreed to pay \$5.0 million in taxes and interest and agreed on the nature and amount of tax credits carried forward into 2007. This resolution did not have a significant impact on our results of operations.

The audit fieldwork associated with our state tax filings for 2007 and 2008 has been completed without a significant proposed adjustment.

17. Other Consolidated Financial Statement Detail

Other Income (Expense), Net

Components of other income (expense), net, are summarized as follows:

(In millions)	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2013	2012	2013	2012
Interest income	\$ 1.5	\$ 5.9	\$ 6.7	\$ 22.6

 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited, continued)

18. Investments in Variable Interest Entities

Consolidated Variable Interest Entities

Our condensed consolidated financial statements include the financial results of variable interest entities in which we are the primary beneficiary.

Knopp

During the three months ended March 31, 2013, we terminated our license agreement with Knopp Neurosciences, Inc. (Knopp), a subsidiary of Knopp Holdings, LLC, for the development, manufacture and commercialization of dexpramipexole in people with amyotrophic lateral sclerosis (ALS). We expect to exercise our put option on the 30.0% of the Class B common shares to Knopp in the fourth quarter.

We had previously determined that we were the primary beneficiary of Knopp because we had the power through the license agreement to direct the activities that most significantly impacted Knopp's economic performance and were required to fund 100% of the research and development costs incurred in support of the collaboration agreement. As such, we consolidated the results of Knopp. In March 2013, we deconsolidated the results of Knopp upon termination of the license agreement. The assets and liabilities of Knopp were not significant to our financial position or results of operations. We have not provided any financing to Knopp other than contractually required amounts previously disclosed in Note 20, *Investments in Variable Interest Entities* included within our 2012 Form 10-K.

For the three and nine months ended September 30, 2013, the collaboration did not incur any development expenses. For the three and nine months ended September 30, 2012, the collaboration incurred development expenses totaling \$15.7 million and \$58.9 million, respectively, which were reflected as research and development expense within our condensed consolidated statements of income.

For additional information, please read Note 20, *Litigation* to these condensed consolidated financial statements.

Neurimmune SubOne AG

In 2007, we entered into a collaboration agreement with Neurimmune SubOne AG (Neurimmune), a subsidiary of Neurimmune AG, for the development and commercialization of antibodies for the treatment of Alzheimer's disease. Neurimmune conducts research to identify potential therapeutic antibodies and we are responsible for the development, manufacturing and commercialization of all products under the collaboration. Based upon our current development plans, we may pay Neurimmune up to \$345.0 million in remaining milestone payments, as well as royalties on sales of any resulting commercial products.

We determined that we are the primary beneficiary of Neurimmune because we have the power through the collaboration to direct the activities that most significantly impact the entity's economic performance and are required to fund 100% of the research and development costs incurred in support of the collaboration agreement. Accordingly, we consolidate the results of Neurimmune.

Amounts that are incurred by Neurimmune for research and development expenses in support of the collaboration that we reimburse are reflected in research and development expense in our condensed consolidated statements of income. Future milestone payments will be reflected within our condensed consolidated statements of income as a charge to the noncontrolling interest, net of tax, when such milestones are achieved.

For the three and nine months ended September 30, 2013, the collaboration incurred development expenses totaling \$6.1 million and \$16.8 million, respectively, which is reflected as research and development expense within our condensed consolidated statements of income, as compared to \$3.4 million and \$8.5 million, respectively, in the prior year comparative periods.

The assets and liabilities of Neurimmune are not significant to our financial position or results of operations as it is a research and development organization. We have not provided any financing to Neurimmune other than previously contractually required amounts.

BIOGEN IDEC INC. AND SUBSIDIARIES
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited, continued)

Unconsolidated Variable Interest Entities

We have relationships with other variable interest entities that we do not consolidate as we lack the power to direct the activities that significantly impact the economic success of these entities. These relationships include investments in certain biotechnology companies and research collaboration agreements.

As of September 30, 2013 and December 31, 2012, the total carrying value of our investments in biotechnology companies that we have determined to be variable interest entities, but do not consolidate as we do not have the power to direct their activities, totaled \$6.8 million and \$9.4 million, respectively. Our maximum exposure to loss related to these variable interest entities is limited to the carrying value of our investments.

We have entered into research collaborations with certain variable interest entities where we are required to fund certain development activities. These development activities are included in research and development expense within our condensed consolidated statements of income, as they are incurred.

We have provided no financing to these variable interest entities other than previously contractually required amounts.

For additional information related to our investments in variable interest entities, please read Note 20, *Investments in Variable Interest Entities* to our consolidated financial statements included within our 2012 Form 10-K.

19. Collaborative and Other Relationships

Samsung Biosimilar Agreement

In February 2012, we finalized an agreement with Samsung BioLogics Co. Ltd. (Samsung Biologics) that established an entity, Samsung Bioepis, to develop, manufacture and market biosimilar pharmaceuticals. Under the terms of the agreement, Samsung Biologics will contribute 280.5 billion South Korean won (approximately \$250.0 million) for an 85 percent stake in Samsung Bioepis and we will contribute approximately 49.5 billion South Korean won (approximately \$45.0 million) for the remaining 15 percent ownership interest. Our investment is limited to this contribution as we have no obligation to provide any additional funding; however, we maintain an option to purchase additional stock in Samsung Bioepis that would allow us to increase our ownership percentage up to 49.9 percent. The exercise of this option is within our control.

During the three months ended September 30, 2013, we contributed the remaining 6.5 billion South Korean won (approximately \$5.8 million) to Samsung Bioepis to complete our obligation to contribute an aggregate of approximately 49.5 billion South Korean won (approximately \$45.0 million) for our 15 percent ownership interest. As of September 30, 2013 and December 31, 2012, the carrying value of our investment in Samsung Bioepis totaled 28.5 billion and 29.7 billion South Korean won (approximately \$26.5 million and \$27.8 million), respectively, which is classified as a component of investments and other assets within our condensed consolidated balance sheets. We recognize our share of the results of operations related to our investment in Samsung Bioepis one quarter in arrears when the results of the entity become available, which is reflected as equity in loss of investee, net of tax within our condensed consolidated statements of income. During the three and nine months ended September 30, 2013, we recognized a loss on our investment of \$6.2 million and \$12.3 million, respectively, as compared to \$1.3 million and \$1.8 million, respectively, in the prior year comparative periods.

Simultaneous with the formation of Samsung Bioepis, we entered into a license agreement and technical development and manufacturing services agreements with Samsung Bioepis. For the three and nine months ended September 30, 2013, we recognized \$4.3 million and \$18.5 million, respectively, in other revenues in relation to these services, as compared to \$4.3 million and \$9.9 million, respectively, in the prior year comparative periods, which is reflected as a component of other revenues within our condensed consolidated statements of income.

For additional information related to our other significant collaboration arrangements, please read Note 21, *Collaborative and Other Relationships* to our consolidated financial statements included within our 2012 Form 10-K.

Isis Pharmaceuticals Inc. (Isis)

In September 2013, we entered into a six year research collaboration with Isis Pharmaceuticals Inc. (Isis) under which both companies will perform discovery level research and then develop and commercialize antisense or other therapeutics for the treatment of neurological disorders. Under the collaboration, Isis will perform research on a set of neurological targets identified within the agreement. Once the research has reached a specific stage of development we will make the determination whether antisense is the preferred approach to develop a therapeutic candidate or whether another modality is preferred. If antisense is selected, Isis will continue development and identify a product candidate. If another modality is used, we will assume the responsibility for identifying a product candidate and developing it.

BIOGEN IDEC INC. AND SUBSIDIARIES
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited, continued)

Under the terms of this agreement, we paid Isis an upfront amount of \$100.0 million. Of this payment, we recorded prepaid research and discovery services of approximately \$25.0 million, representing the value of the Isis full time equivalent employee resources which are required by the collaboration to provide research and discovery services to us over the next six years. The remaining \$75.0 million of the upfront payment was recorded as research and development expense in the third quarter of 2013, the period in which we entered into the collaboration, as it represents the purchase of intellectual property that has not reached technological feasibility.

Isis is also eligible to receive milestone payments, license fees and royalty payments for all treatments developed through this collaboration, with the specific amount dependent upon the modality of the molecule advanced by us.

For antisense product candidates, Isis will be responsible for global development through the completion of a Phase 2 trial and we will provide advice on the clinical trial design and regulatory strategy. We have an option to license the product candidate until completion of the Phase 2 trial. If we exercise our option, we will pay Isis up to a \$70.0 million license fee and assume global development, regulatory and commercialization responsibilities. Isis could receive additional milestone payments upon the achievement of certain regulatory milestones of up to \$150.0 million, plus additional amounts related to the cost of clinical trials conducted by Isis under the collaboration, and royalties on future sales if we successfully develop the product candidate after option exercise.

For product candidates using a different modality, we will be responsible for global development through all stages and will owe Isis up to \$90.0 million upon the achievement of certain regulatory milestones.

Other Research and Discovery Arrangements

During the three months ended September 30, 2013, we entered into research and discovery arrangements that resulted in \$35.0 million recorded as investments and other assets within our condensed consolidated balance sheet and \$2.0 million recorded as research and development expense within our condensed consolidated statements of income. These additional arrangements include the potential for future milestone payments based on clinical and commercial development over a period of several years.

20. Litigation

Massachusetts Department of Revenue

On June 8, 2010, we received Notices of Assessment from the Massachusetts DOR against BIMA for the payment of additional corporate excise tax, including associated interest and penalties, related to our 2004, 2005 and 2006 state tax filings. On February 3, 2011, we filed a petition with the Massachusetts ATB appealing the denial of our application for abatement, and on October 15, 2013 we reached a settlement resolving the dispute.

Hoechst — Genentech Arbitration

On October 24, 2008, Hoechst GmbH (Hoechst), an affiliate of Sanofi-Aventis Deutschland GmbH (Sanofi), filed a request for arbitration with the ICC International Court of Arbitration (Paris) claiming that Genentech breached a license agreement, now terminated, under which Hoechst claims rights (the Hoechst License). The Hoechst License granted Genentech certain rights with respect to U.S. Patents 5,849,522 ('522 patent) and 6,218,140 ('140 patent). In 2012, the arbitrator ruled that Genentech is liable to Hoechst for license royalties with respect to sales of RITUXAN, and in February 2013 he awarded Hoechst royalties of EUR108 million together with interest (estimated by Hoechst to be approximately EUR54 million as of the date of the award). Genentech has filed Declarations of Appeal in the Paris Court of Appeal to vacate the arbitral awards in their entirety and those annulment proceedings are pending. Genentech nonetheless paid Hoechst the amounts that Hoechst claims that it is owed, while reserving all legal rights, including the right to challenge the awards and the right to claim reimbursement.

Although we are not a party to the arbitration, we expect that amounts paid by Genentech and not ultimately recovered from Hoechst may be a cost charged to our collaboration with Genentech. Our revenues from unconsolidated joint business were reduced by approximately \$50.0 million in the second quarter of 2011 and by approximately \$41.5 million in the first quarter of 2013 to reflect our share of the royalties awarded to Hoechst and the interest Hoechst claims. Our share may vary from these amounts if Genentech is successful in challenging the awards.

BIOGEN IDEC INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited, continued)

Sanofi '522 and '140 Patent Litigation

On October 27, 2008, Sanofi filed suit against Genentech and Biogen Idec in the United States District Court for the Eastern District of Texas claiming that RITUXAN infringes the '522 patent and the '140 patent. That action was transferred and consolidated with an action filed on the same day by Genentech and Biogen Idec against Sanofi in the United States District for the Northern District of California seeking declaratory judgments that RITUXAN does not infringe the patents and that the asserted patent claims are invalid and unenforceable. On April 21, 2011, the federal court in California entered a separate and final judgment of non-infringement, and the United States Court of Appeals for the Federal Circuit affirmed on March 22, 2012. The federal court in California has stayed further proceedings relating to Biogen Idec's and Genentech's claims for a declaration that the asserted patent claims are invalid and unenforceable, and no trial date has been set on those claims.

'755 Patent Litigation

On September 15, 2009, we were issued U.S. Patent No. 7,588,755 ('755 Patent), which claims the use of interferon beta for immunomodulation or treating a viral condition, viral disease, cancers or tumors. This patent, which expires in September 2026, covers, among other things, the treatment of MS with our product AVONEX. On May 27, 2010, Bayer Healthcare Pharmaceuticals Inc. (Bayer) filed a lawsuit against us in the U.S. District Court for the District of New Jersey seeking a declaratory judgment of patent invalidity and non-infringement and seeking monetary relief in the form of attorneys' fees, costs and expenses. On May 28, 2010, BIMA filed a lawsuit in the U.S. District Court for the District of New Jersey alleging infringement of the '755 Patent by EMD Serono, Inc. (manufacturer, marketer and seller of REBIF), Pfizer, Inc. (co-marketer of REBIF), Bayer (manufacturer, marketer and seller of BETASERON and manufacturer of EXTAVIA), and Novartis Pharmaceuticals Corp. (marketer and seller of EXTAVIA) and seeking monetary damages, including lost profits and royalties. The court has consolidated the two lawsuits, and we refer to the two actions as the "Consolidated '755 Patent Actions".

Bayer, Pfizer, Novartis and EMD Serono have all filed counterclaims in the Consolidated '755 Patent Actions seeking declaratory judgments of patent invalidity and non-infringement, and seeking monetary relief in the form of costs and attorneys' fees, and EMD Serono and Bayer have each filed a counterclaim seeking a declaratory judgment that the '755 Patent is unenforceable based on alleged inequitable conduct. Bayer has also amended its complaint to seek such a declaration. No trial date has been set.

Novartis V&D '688 Patent Litigation

On January 26, 2011, Novartis Vaccines and Diagnostics, Inc. (Novartis V&D) filed suit against us in the United States District Court for the District of Delaware, alleging that TYSABRI infringes U.S. Patent No. 5,688,688 "Vector for Expression of a Polypeptide in a Mammalian Cell" ('688 Patent), which was granted in November 1997 and expires in November 2014. Novartis V&D seeks a declaration of infringement, a finding of willful infringement, compensatory damages in the form of a royalty and lost profits, treble damages, interest, costs and attorneys' fees. On July 18, 2012, the court granted Novartis V&D leave to add Novartis Pharma AG, an alleged exclusive licensee of the '688 Patent, as co-plaintiff. We have not formed an opinion that an unfavorable outcome is either "probable" or "remote", and are unable to estimate the magnitude or range of any potential loss. We believe that we have good and valid defenses to the complaint and will vigorously defend against it. A trial on liability has been set for January 2014.

Italian National Medicines Agency

In the fourth quarter of 2011, Biogen Idec SRL received a notice from the Italian National Medicines Agency (Agenzia Italiana del Farmaco or AIFA) stating that sales of TYSABRI for the period from February 2009 through February 2011 exceeded by EUR30.7 million a reimbursement limit established pursuant to a Price Determination Resolution (Price Resolution) granted by AIFA in December 2006. The Price Resolution set the initial price for the sale of TYSABRI in Italy and limited the amount of government reimbursement "for the first 24 months" of TYSABRI sales. As the basis for the claim, the AIFA notice referred to a 2001 Decree that provides for an automatic 24-month renewal of the terms of all Price Resolutions that are not renegotiated prior to the expiration of their term.

On November 17, 2011, Biogen Idec SRL responded to AIFA that the reimbursement limit in the Price Resolution by its terms applied only to the first 24 months of TYSABRI sales, which began in February 2007. On December 23, 2011, we filed an appeal in the Regional Administrative Tribunal of Lazio (Il Tribunale Amministrativo Regionale per il Lazio) in Rome against AIFA, seeking a ruling that our interpretation of the Price Resolution is valid and that the position of AIFA is unenforceable, and the appeal is pending. On November 21, 2012, the tribunal ruled that the reimbursement limit would not automatically renew for another 24-month term pending resolution of the dispute.

BIOGEN IDEC INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited, continued)

In June 2013, the Price and Reimbursement Committee of AIFA informed Biogen Idec SRL that sales of TYSABRI for February 2011 through February 2013 exceeded the reimbursement limit in the Price Resolution. We dispute that the reimbursement limit applies to this period for the same reason that we dispute its application to the February 2009 through February 2011 period.

In July 2013, we reached an agreement in principle with the Price and Reimbursement Committee of AIFA to settle all of AIFA's claims relating to sales of TYSABRI in excess of the reimbursement limit for the periods between February 2009 through February 2013 for an aggregate repayment of EUR33.3 million. As part of this settlement, we also agreed that the reimbursement limit will no longer be in effect as of February 2013. The settlement is pending approval by the Italy Avvocatura Generale dello Stato and the board of directors of AIFA. Upon this approval and the execution of the settlement, we will dismiss our appeal.

Average Manufacturer Price Litigation

On September 6, 2011, we and several other pharmaceutical companies were served with a complaint originally filed under seal on October 28, 2008 in the United States District Court for the Eastern District of Pennsylvania by Ronald Streck (the relator) on behalf of himself and the United States, and the states of New Jersey, California, Rhode Island, Michigan, Montana, Wisconsin, Massachusetts, Tennessee, Oklahoma, Texas, Indiana, New Hampshire, North Carolina, Florida, Georgia, New Mexico, Illinois, New York, Virginia, Delaware, Hawaii, Louisiana, Connecticut, and Nevada (collectively, the States), and the District of Columbia, alleging violations of the False Claims Act, 31 U.S.C. § 3729 et seq. and state and District of Columbia statutory counterparts. The United States and the States have declined to intervene, and the District of Columbia has not intervened. The complaint as amended alleges that Biogen Idec and other defendants underreport Average Manufacturer Price (AMP) information to the Centers for Medicare and Medicaid Services, thereby causing Biogen Idec and the other defendants to underpay rebates under the Medicaid Drug Rebate Program. The relator alleges that the underreporting has occurred because Biogen Idec and other defendants improperly consider various payments that they make to drug wholesalers to be discounts under applicable federal law. On July 3, 2012, the court dismissed all state and federal claims as to AMP submissions before January 1, 2007, and dismissed the remaining state-law claims in whole as to claims under New Mexico law and in part as to claims under the laws of Delaware, New Hampshire, Texas, Connecticut, Georgia, Indiana, Montana, New York, Oklahoma, and Rhode Island. The court denied our motion to dismiss federal law claims as to AMP submissions after January 1, 2007. A trial has been set for September 2014. We have not formed an opinion that an unfavorable outcome under the remaining claims is either "probable" or "remote," and are unable at this stage of the litigation to form an opinion as to the magnitude or range of any potential loss. We believe that we have good and valid defenses and intend to vigorously defend against the allegations.

Government Review of Sales and Promotional Practices

We have learned that state and federal governmental authorities are investigating our sales and promotional practices. We are cooperating with the government.

Qui Tam Litigation

In August, 2012, we learned that a relator, on behalf of the United States and certain states, filed a suit under seal on February 17, 2011 against us, Elan Corporation, plc, and Elan Pharmaceuticals, Inc. in the United States District Court for the Western District of Virginia. We have neither seen nor been served with the complaint, but understand that it was filed under the Federal False Claims Act.

Canada Lease Dispute

On April 18, 2008, First Real Properties Limited filed suit against Biogen Idec Canada Inc. (BI Canada) in the Superior Court of Justice in London, Ontario alleging breach of an offer for lease of property signed by BI Canada in 2007 and an unsigned proposed lease for the same property. The plaintiff's complaint seeks \$7.0 million in damages, but the plaintiff submitted an expert report estimating the plaintiff's damages to be approximately \$2.5 million after mitigation. The plaintiff also seeks costs of approximately \$0.4 million and interest. A trial occurred in February 2013 and the decision is pending.

BIAGEN IDEC INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited, continued)

Knopp Neurosciences Dispute

On February 25, 2013, Knopp filed suit against Biogen Idec International Holding Ltd. in the United States District Court for the District of Massachusetts, alleging that Biogen Idec wrongfully terminated its license agreement with Knopp for the development of a product for ALS. Knopp seeks damages and injunctive relief. Knopp had also sought the transfer of certain biosamples, but the court dismissed that claim with prejudice in June 2013. No trial date has been set for Knopp's remaining claims. We have not formed an opinion that an unfavorable outcome is either "probable" or "remote," and are unable at this stage of the litigation to form an opinion as to the magnitude or range of any potential loss. We believe that we have good and valid defenses and are vigorously defending against the claims.

Product Liability and Other Legal Proceedings

We are also involved in product liability claims and other legal proceedings generally incidental to our normal business activities. While the outcome of any of these proceedings cannot be accurately predicted, we do not believe the ultimate resolution of any of these existing matters would have a material adverse effect on our business or financial condition.

21. Commitments and Contingencies

In 2006, we acquired Fumapharm AG. As part of this acquisition we acquired FUMADERM and TECFIDERA (together, Fumapharm Products). We paid \$220.0 million upon closing of the transaction and agreed to pay an additional \$15.0 million if a Fumapharm Product is approved for MS in the U.S. or E.U. In the second quarter of 2013, we paid this \$15.0 million contingent payment as TECFIDERA was approved in the U.S. for MS by the FDA. We are also required to make the following additional milestone payments to former shareholders of Fumapharm AG based on the attainment of certain cumulative sales levels of Fumapharm Products and the level of total net sales of Fumapharm Products in the prior twelve month period, as defined in the acquisition agreement:

Prior 12 Month Sales	Cumulative Sales Level				
	\$500M	\$1.0B	\$2.0B	\$3.0B	Each additional \$1.0B up to \$20.0B
	Payment Amount (In millions)				
< \$500 million	\$ —	\$ —	\$ —	\$ —	\$ —
\$500 million - \$1.0 billion	22.0	25.0	50.0	50.0	50.0
\$1.0 billion - \$1.5 billion	—	50.0	100.0	100.0	100.0
\$1.5 billion - \$2.0 billion	—	—	150.0	150.0	150.0
\$2.0 billion - \$2.5 billion	—	—	200.0	200.0	200.0
\$2.5 billion - \$3.0 billion	—	—	—	250.0	250.0
> \$3.0 billion	—	—	—	—	300.0

These payments will be accounted for as an increase to goodwill as incurred, in accordance with the accounting standard applicable to business combinations when we acquired Fumapharm. Any portion of the payment which is tax deductible will be recorded as a reduction to goodwill. Payments are due within 60 days following the end of the quarter in which the applicable cumulative sales level has been reached.

22. Segment Information

We operate as one business segment, which is the business of discovering, developing, manufacturing and marketing therapies for the treatment of multiple sclerosis and other autoimmune disorders, neurodegenerative diseases and hemophilia and, therefore, our chief operating decision-maker manages the operations of our company as a single operating segment.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with our condensed consolidated financial statements and accompanying notes beginning on page 5 of this quarterly report on Form 10-Q and our audited consolidated financial statements and related notes included in our Annual Report on Form 10-K for the year ended December 31, 2012 (2012 Form 10-K). Certain totals may not sum due to rounding.

Executive Summary**Introduction**

Biogen Idec is a global biotechnology company focused on discovering, developing, manufacturing and marketing therapies for the treatment of multiple sclerosis and other autoimmune disorders, neurodegenerative diseases and hemophilia. We also collaborate on the development and commercialization of RITUXAN and anti-CD20 product candidates for the treatment of non-Hodgkin's lymphoma and other conditions.

In the near term, our revenues are dependent upon continued sales of our four principal products, AVONEX, TYSABRI, TECFIDERA and RITUXAN. In the longer term, our revenue growth will be dependent upon the successful clinical development, regulatory approval and launch of new commercial products, our ability to obtain and maintain patents and other rights related to our marketed products and assets originating from our research and development efforts, and successful execution of external business development opportunities. As part of our ongoing research and development efforts, we have devoted significant resources to conducting clinical studies to advance the development of new pharmaceutical products and to explore the utility of our existing products in treating disorders beyond those currently approved in their labels.

Financial Highlights

The following table is a summary of financial results achieved:

(In millions, except per share amounts and percentages)	For the Three Months Ended September 30,		
	2013 (1)	2012	Change %
Total revenues	\$ 1,827.8	\$ 1,385.6	31.9%
Income from operations	\$ 684.5	\$ 535.3	27.9%
Net income attributable to Biogen Idec Inc.	\$ 487.6	\$ 398.4	22.4%
Diluted earnings per share attributable to Biogen Idec Inc.	\$ 2.05	\$ 1.67	22.3%

- (1) Total revenues for the three months ended September 30, 2013 includes 100% of net revenues related to sales of TYSABRI as a result of our acquisition of TYSABRI rights from Elan on April 2, 2013 and net revenues related to sales of TECFIDERA, our new oral first-line treatment for people with relapsing forms of multiple sclerosis (MS), which was approved by the FDA in March 2013 and commenced commercial sales in April 2013.

As described below under "Results of Operations," our operating results for the three months ended September 30, 2013 reflect the following:

- Worldwide AVONEX revenues totaled \$733.4 million in the third quarter of 2013, representing a decrease of 0.4% over the same period in 2012.
- Worldwide TYSABRI revenues totaled \$401.0 million in the third quarter of 2013, representing an increase of 45.9% over the same period in 2012. The increase in revenue is primarily due to 100% of net U.S. revenue being recognized starting in April 2013 as a result of our acquisition of TYSABRI rights.
- Worldwide TECFIDERA revenues totaled \$286.4 million in the third quarter of 2013. Approximately \$12.0 million of U.S. TECFIDERA revenues in the third quarter represent inventory in the channel incremental to the \$82.0 million we reported in the second quarter.
- Our share of RITUXAN revenues totaled \$303.2 million in the third quarter of 2013, representing an increase of 5.4% over the same period in 2012.
- Total cost and expenses increased 30.4% in the third quarter of 2013, compared to the same period in 2012. This increase resulted from an 88.6% increase in the amortization of acquired intangible assets, a 68.4% increase in cost of sales, a 35.4% increase in selling, general and administrative expense and a 34.8% increase in research and development expense partially offset by a 100.0% decrease in collaboration profit sharing over the same period in 2012.

The increases in cost of sales and the amortization of acquired intangibles are a result of our 2013 acquisition of the TYSABRI rights and higher amortization recorded on our AVONEX core technology asset. Our increase in research and development expense was primarily attributable to the upfront payment we made to Isis Pharmaceuticals, Inc. upon entering into a six year research collaboration. Higher selling, general and administrative expense resulted from increased costs incurred in connection with our product launch of TECFIDERA in the U.S. and our building commercial capabilities for potential product launches of ELOCTATE (recombinant factor VIII Fc fusion protein) and ALPROLIX (recombinant factor IX Fc fusion protein), respectively.

Upon the acquisition of the TYSABRI rights from Elan we stopped recording collaboration profit sharing expense.

We generated \$1,476.1 million of net cash flows from operations for the nine months ended September 30, 2013, which were primarily driven by earnings. Cash, cash equivalents and marketable securities totaled approximately \$1,042.3 million as of September 30, 2013.

Acquisitions

On April 2, 2013, we acquired full ownership of, and strategic, commercial and decision-making rights to, TYSABRI from Elan. Upon the closing of the transaction, our collaboration agreement with Elan was terminated. For additional information related to this transaction, please read Note 2, *Acquisitions* to our condensed consolidated financial statements included within this report.

Business Environment

We conduct our business within the biotechnology and pharmaceutical industries, which are highly competitive. Many of our competitors are working to develop or have commercialized products similar to those we market or are developing, including oral and other alternative formulations that may compete with AVONEX, TYSABRI, TECFIDERA or other products we are developing. In addition, the commercialization of certain of our own approved products and pipeline product candidates may negatively impact future sales of AVONEX, TYSABRI, TECFIDERA or all three. We may also face increased competitive pressures from the emergence of biosimilars, generic versions of TECFIDERA or related prodrug derivatives. In the U.S., AVONEX, TYSABRI, and RITUXAN are licensed under the Public Health Service Act (PHSA) as biological products. In March 2010, U.S. healthcare reform legislation amended the PHSA to authorize the FDA to approve biological products, known as biosimilars, that are similar to or interchangeable with previously approved biological products based upon potentially abbreviated data packages.

Global economic conditions continue to present challenges for our industry. Governments in many international markets where we operate have announced or implemented austerity measures to constrain the overall level of government expenditures. These measures, which include efforts aimed at reforming health care coverage and reducing health care costs, particularly in certain countries in Europe, continue to exert pressure on product pricing, have delayed reimbursement for our products, and have negatively impacted our revenues and results of operations. There is also continued uncertainty regarding the potential impact of the recent shutdown of the U.S. federal government in October 2013 and the ongoing debates related to the federal budget deficit and debt ceiling. Changes to monetary and fiscal policies and health care legislation in the U.S. may result from these debates, which could impact reimbursement for our products and otherwise adversely affect our business and results of operations. For additional information about certain risks that could negatively impact our financial position or future results of operations, please read the “*Risk Factors*” section of this report.

The Affordable Care Act

On October 1, 2013, enrollment in health exchanges created under the Patient Protection and Affordable Care Act (Affordable Care Act) began. We currently expect implementation of most of the major provisions of the Affordable Care Act to continue. Changes to the Affordable Care Act, or other federal legislation regarding health care access, financing, or delivery and other actions taken by individual states concerning the possible expansion of Medicaid could impact our financial position or results of operations.

The American Taxpayer Relief Act of 2012

The American Taxpayer Relief Act of 2012 (ATRA) was passed by the House of Representatives and the Senate on January 1, 2013, and was signed into law by the President on January 2, 2013. The ATRA, among other things, extends through 2013 an array of temporary business and individual tax provisions. We do not expect that the ATRA will have a material impact on our financial position or results of operation.

Key Pipeline and Product Developments

TECFIDERA

In March 2013, the FDA approved TECFIDERA, our first-line oral treatment for people with relapsing forms of MS. The FDA approval was based on TECFIDERA's comprehensive development program, in which TECFIDERA demonstrated significant reductions in MS disease activity coupled with favorable safety and tolerability in the Phase 3 DEFINE and CONFIRM studies. We commenced our commercial launch of TECFIDERA in the U.S. in April 2013.

In March 2013, we also received a positive opinion from the Committee for Medicinal Products for Human Use (CHMP) in the European Union (E.U.) recommending a marketing authorization be granted for TECFIDERA. The CHMP's recommendation was referred to the European Commission, which grants marketing authorization for medicines in the E.U.

We are seeking to launch TECFIDERA in the E.U. with patent and regulatory data protection. We were granted a European patent that extends until 2028 and covers the expected E.U. TECFIDERA label dose of 480 mg. We believe TECFIDERA is also entitled to regulatory data protection in the E.U. and are working to make TECFIDERA's entitlement to regulatory data protection in the E.U. clear to all parties prior to launch. It is difficult to predict the precise timing or outcome of this process, which has delayed the anticipated approval of TECFIDERA in the E.U.

TECFIDERA was approved in Canada in April 2013 and Australia in July 2013.

In September 2013, we expanded our portfolio of patents related to TECFIDERA as we were granted U.S. Patent No. 8,524,773 having claims to a method of treating MS using monomethyl fumarate. This patent expires in 2018.

We acquired TECFIDERA as part of our acquisition of Fumapharm AG in 2006. For more information about this acquisition and associated milestone obligations, please read the subsection entitled "*Contractual Obligations and Off-Balance Sheet Arrangements – Contingent Consideration*" of this "*Management's Discussion and Analysis of Financial Condition and Results of Operations*."

ELOCTATE (recombinant factor VIII Fc fusion protein) and ALPROLIX (recombinant factor IX Fc fusion protein)

We submitted a Biologics License Application to the FDA for marketing approval of ELOCTATE in hemophilia A, a rare inherited disorder which inhibits blood coagulation, during the first quarter of 2013. The regulatory submission was based on the positive results from the Phase 3 study known as A-LONG. In May 2013, the FDA accepted our application for ELOCTATE and granted us a standard review timeline. We are in discussions with the FDA pertaining to the validation of certain steps in the manufacturing process for ELOCTATE. Based on these discussions, there is a possibility of a delay in the potential approval of ELOCTATE.

We submitted a Biologics License Application to the FDA for marketing approval of ALPROLIX in hemophilia B, a rare inherited disorder which inhibits blood coagulation, during the fourth quarter of 2012. The regulatory submission was based on the positive results from the Phase 3 study known as B-LONG. In March 2013, the FDA accepted our application for ALPROLIX and granted us a standard review timeline.

We collaborate with Swedish Orphan Biovitrum AB on the development and commercialization of ELOCTATE and ALPROLIX. For information about this collaboration, please read Note 21, *Collaborative and Other Relationships* to our consolidated financial statements included within our 2012 Form 10-K.

PLEGRIDY (Peginterferon beta-1a)

During the second quarter of 2013, we submitted a Biologics License Application to the FDA for marketing approval of PLEGRIDY in relapsing forms of MS. The regulatory submission was based on the results from the first year of the two-year global Phase 3 ADVANCE study. During the second quarter of 2013, we also submitted a Marketing Authorisation Application (MAA) for PLEGRIDY in relapsing forms of MS to the European Medicines Agency (EMA). The FDA and the EMA accepted our applications in July 2013 and granted us a standard review timeline.

GA101

We collaborate with Genentech, Inc., a wholly-owned member of the Roche Group, on the development and commercialization of GA101, a monoclonal antibody. In July 2013, the Roche Group announced positive results from the Phase 3 CLL11 study. At a pre-planned interim analysis, an independent data monitoring committee determined that the study met its primary endpoint showing that GA101 plus chlorambucil helped people live significantly longer without their disease worsening progression-free survival compared to RITUXAN plus chlorambucil. Based on an earlier analysis of the CLL11 study, marketing applications for GA101 were submitted to regulatory authorities including the FDA and EMA in April 2013. Due to the significance of the positive trial results and the serious and life threatening nature of CLL, the FDA granted the GA101 application both breakthrough therapy designation and priority review. For information about our collaboration with Genentech, please read Note 21, *Collaborative and Other Relationships* to our consolidated financial statements included within our 2012 Form 10-K.

Results of Operations

Revenues

Revenues are summarized as follows:

(In millions, except percentages)	For the Three Months Ended September 30,				For the Nine Months Ended September 30,			
	2013		2012		2013		2012	
Product revenues:								
United States	\$ 972.9	53.2%	\$ 560.2	40.4%	\$ 2,465.4	49.6%	\$ 1,605.6	39.2%
Rest of world	480.7	26.3%	478.9	34.6%	1,469.9	29.6%	1,485.8	36.3%
Total product revenues	1,453.6	79.5%	1,039.1	75.0%	3,935.3	79.2%	3,091.4	75.4%
Unconsolidated joint business	303.2	16.6%	287.8	20.8%	856.6	17.2%	857.0	20.9%
Other revenues	71.0	3.9%	58.6	4.2%	174.5	3.5%	150.1	3.7%
Total revenues	\$ 1,827.8	100.0%	\$ 1,385.5	100.0%	\$ 4,966.4	100.0%	\$ 4,098.5	100.0%

Product Revenues

Product revenues are summarized as follows:

(In millions, except percentages)	For the Three Months Ended September 30,				For the Nine Months Ended September 30,			
	2013		2012		2013		2012	
AVONEX	\$ 733.4	50.5%	\$ 736.2	70.8%	\$ 2,253.9	57.3%	\$ 2,159.9	69.9%
TYSABRI	401.0	27.6%	274.8	26.4%	1,100.0	28.0%	840.7	27.2%
TECFIDERA	286.4	19.7%	—	—%	478.5	12.2%	—	—%
Other product revenues	32.8	2.3%	28.1	2.7%	102.9	2.6%	90.8	2.9%
Total product revenues	\$ 1,453.6	100.0%	\$ 1,039.1	100.0%	\$ 3,935.3	100.0%	\$ 3,091.4	100.0%

AVONEX

Revenues from AVONEX are summarized as follows:

(In millions, except percentages)	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2013	2012	Change %	2013	2012	Change %
United States	\$ 456.7	\$ 462.0	(1.1)%	\$ 1,427.6	\$ 1,326.8	7.6 %
Rest of world	276.7	274.2	0.9 %	826.3	833.1	(0.8)%
Total AVONEX revenues	\$ 733.4	\$ 736.2	(0.4)%	\$ 2,253.9	\$ 2,159.9	4.4 %

For the three months ended September 30, 2013, compared to the same period in 2012, the decrease in U.S. AVONEX revenues was primarily due to a 17% decrease in unit sales volume, which was attributable in part to patients transitioning to TECFIDERA, partially offset by price increases. For the nine months ended September 30, 2013, compared to the same period in 2012, the increase in U.S. AVONEX revenues was primarily due to price increases partially offset by a 5% decrease in unit sales volume, which was attributable in part to patients transitioning to TECFIDERA. U.S. AVONEX unit sales volume for the prior year nine months ended September 30, 2012 was negatively impacted by a decrease in commercial demand and a recall of a limited amount of AVONEX product.

For the three months ended September 30, 2013, compared to the same period in 2012, the increase in rest of world AVONEX revenues was primarily due to increased unit demand primarily in Europe partially offset by pricing reductions resulting from austerity measures enacted in some countries. For the nine months ended September 30, 2013, compared to the same period in 2012, the decrease in rest of world AVONEX revenues was primarily due to pricing reductions resulting from austerity measures enacted in some countries partially offset by increased unit demand primarily in Europe and Brazil. Increased demand resulted in increases of approximately 5% and 3%, respectively, in rest of world AVONEX unit sales volume for the three and nine months ended September 30, 2013, over the prior year comparative periods. The change in rest of world AVONEX revenues for the three and nine months ended September 30, 2013, compared to the same periods in 2012, also reflects losses recognized in relation to the settlement of certain cash flow hedge instruments under our foreign currency hedging program partially offset by the positive impacts of foreign currency exchange rates.

Losses recognized in relation to the settlement of certain cash flow hedge instruments under our foreign currency hedging program totaled \$5.1 million and \$4.2 million, respectively, for the three and nine months ended September 30, 2013, compared to gains of \$8.6 million and \$22.5 million, respectively, in the prior year comparative periods.

We expect AVONEX to continue facing increased competition in the MS marketplace in both the U.S. and rest of world. We and a number of other companies are working to develop or have commercialized additional treatments for MS, including oral and other alternative formulations that may compete with AVONEX. The launch and growth of TECFIDERA and the commercialization of certain of our own products, such as PLEGRIDY, may also negatively impact future sales of AVONEX. Increased competition also may lead to reduced unit sales of AVONEX, as well as increasing price pressures particularly in geographic markets outside the U.S.

TYSABRI

Revenues from TYSABRI are summarized as follows:

(In millions, except percentages)	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2013	2012	Change %	2013	2012	Change %
United States	\$ 232.2	\$ 98.2	136.5 %	\$ 563.5	\$ 278.8	102.1 %
Rest of world	168.8	176.6	(4.4)%	536.5	561.9	(4.5)%
Total TYSABRI revenues	\$ 401.0	\$ 274.8	45.9 %	\$ 1,100.0	\$ 840.7	30.8 %

The increase in U.S. TYSABRI revenue for the three and nine months ended September 30, 2013, compared to the same periods in 2012, is primarily due to our recognition, starting in April 2013, of 100% of net revenues on TYSABRI in-market sales due to our acquisition of the remaining TYSABRI rights and increases in TYSABRI prices.

For the three months ended September 30, 2013, compared to the same period in 2012, our U.S. revenues increased due to our acquisition of TYSABRI rights and price increases, partially offset by a 6% decrease in unit sales volume, which was attributable in part to patients transitioning to TECFIDERA.

For the nine months ended September 30, 2013, compared to the same period in 2012, our U.S. revenues increased due to our acquisition of TYSABRI rights, price increases and a 3% increase in unit sales volume.

Based on data reported by Elan and our sales to third party customers, total U.S. TYSABRI in-market sales were \$232.2 million and \$230.4 million for the three months ended September 30, 2013 and 2012, respectively. For the nine months ended September 30, 2013 and 2012, total U.S. TYSABRI in-market sales were \$707.5 million and \$642.9 million, respectively. The increase in the three months ended September 30, 2013 in-market sales compared to the prior year comparable period is due to price increases offset by a reduction in unit sales volume due in part to patients transitioning to TECFIDERA. The increase in the nine months ended September 30, 2013 compared to the prior year comparable period is due to price increases and an increase in unit sales volume.

For the three months ended September 30, 2013, compared to the same period in 2012, the decrease in rest of world TYSABRI revenues was primarily due to a decrease in unit demand and pricing reductions from austerity measures enacted in some European countries partially offset by an increase in unit demand in Brazil. For the nine months ended September 30, 2013, compared to the same period in 2012, the decrease in rest of world TYSABRI revenues was primarily due to an EUR15.4 million (\$20.0 million) reduction in revenues for a probable settlement of outstanding claims by AIFA relating to sales of TYSABRI in Italy in excess of a reimbursement limit for the periods between February 2009 and February 2013 and pricing reductions from austerity measures enacted in some countries partially offset by a 3% increase in unit demand primarily in Brazil. The change in rest of world TYSABRI revenues for the three and nine months ended September 30, 2013, compared to the same periods in 2012, also reflects losses recognized in relation to the settlement of certain cash flow hedge instruments under our foreign currency hedging program partially offset by the positive impacts of foreign currency exchange rates.

Losses recognized in relation to the settlement of certain cash flow hedge instruments under our foreign currency hedging program totaled \$2.2 million and \$1.9 million, respectively, for the three and nine months ended September 30, 2013, compared to gains of \$3.4 million and \$8.5 million, respectively, in the prior year comparative periods.

For additional information relating to the agreement in principle with AIFA, please read Note 3, *Accounts Receivable* to our condensed consolidated financial statements included in this report. As described in Note 3, the settlement with AIFA is pending approval by the Italy Avvocatura Generale dello Stato and the board of directors with AIFA, which we expect to occur in the fourth quarter of 2013, however, the exact timing of approval is outside our control. Upon approval of the settlement, any deferred revenue related to the periods subsequent to February 2011 that is in excess of the settlement will be recognized as revenue. Currently, we expect to record approximately \$95.0 million of incremental revenue.

We expect TYSABRI to continue facing increased competition in the MS marketplace in both the U.S. and rest of world. We and a number of other companies are working to develop or have commercialized additional treatments for MS, including oral and other alternative formulations that may compete with TYSABRI. In addition, the launch and growth of TECFIDERA and the commercialization of certain of our own products may negatively impact future sales of TYSABRI. Increased competition may also lead to reduced unit sales of TYSABRI, as well as increasing price pressure. In addition, safety warnings included in the TYSABRI label, such as the risk of progressive multifocal leukoencephalopathy (PML), and any future safety-related label changes, may limit the growth of TYSABRI unit sales. We continue to research and develop protocols and therapies that may reduce risk and improve outcomes of PML in patients. Our efforts to stratify patients into lower or higher risk for developing PML, including through the JCV antibody assay, and other on-going or future clinical trials involving TYSABRI may have a negative impact on prescribing behavior, which may result in decreased product revenues from sales of TYSABRI.

TECFIDERA

Revenues from TECFIDERA are summarized as follows:

(In millions, except percentages)	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2013	2012	Change %	2013	2012	Change %
United States	\$ 284.0	\$ —	**	\$ 474.3	\$ —	**
Rest of world	2.4	—	**	4.2	—	**
Total TECFIDERA revenues	\$ 286.4	\$ —	**	\$ 478.5	\$ —	**

During the nine months ended September 30, 2013, we received marketing approval for TECFIDERA in the U.S., Canada and Australia. U.S. sales began in April 2013.

Approximately \$12.0 million of U.S. TECFIDERA revenues in the third quarter represent inventory in the channel incremental to the \$82.0 million we reported in the second quarter.

In the first two quarters subsequent to its commercial launch in the United States, approximately 75% of new patients taking TECFIDERA have switched from a different MS therapy, including our products AVONEX and TYSABRI. We believe that the previous therapies from which these patients switched to TECFIDERA is roughly proportionate to the current market share distribution of all products currently approved to treat relapsing remitting MS. As TECFIDERA has only been approved for six months, we have a very limited product history and it is difficult to estimate trends of future product sales of TECFIDERA and the resulting impact on sales and market share of our other therapies and other competing MS therapies.

Other Product Revenues

Other product revenues are summarized as follows:

(In millions, except percentages)	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2013	2012	Change %	2013	2012	Change %
FAMPYRA	\$ 16.7	\$ 12.2	36.9%	\$ 56.7	\$ 46.9	20.9%
FUMADERM	16.1	15.9	1.3%	46.2	43.9	5.2%
Total other product revenues	\$ 32.8	\$ 28.1	16.7%	\$ 102.9	\$ 90.8	13.3%

We have a license from Acorda to develop and commercialize FAMPYRA in all markets outside the U.S. For information about our relationship with Acorda, please read Note 21, *Collaborative and Other Relationships* to our consolidated financial statements included within our 2012 Form 10-K.

For the three months ended September 30, 2013, compared to the same period in 2012, the increase in FAMPYRA revenue was primarily due to increased demand in Germany and France. For the nine months ended September 30, 2013, compared to the same period in 2012, the increase in FAMPYRA revenue was due to the recognition of deferred revenue and increased demand, partially offset by pricing reductions resulting from austerity measures enacted in some countries. FAMPYRA revenues for the nine months ended September 30, 2013 includes the recognition of revenues previously deferred in Germany as a result of finalizing the contract that included the final negotiated fixed price, which was higher than the lowest point of the initial range cited by the German pricing authority.

Unconsolidated Joint Business Revenues

We collaborate with Genentech on the development and commercialization of RITUXAN. For additional information related to this collaboration, including information regarding the pre-tax co-promotion profit sharing formula for RITUXAN and its impact on future unconsolidated joint business revenues, please read Note 21, *Collaborative and Other Relationships* to our consolidated financial statements included within our 2012 Form 10-K.

Revenues from unconsolidated joint business are summarized as follows:

(In millions, except percentages)	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2013	2012	Change %	2013	2012	Change %
Biogen Idec's share of co-promotion profits in the U.S.	\$ 281.7	\$ 258.1	9.1 %	\$ 832.8	\$ 774.9	7.5 %
Reimbursement of selling and development expenses in the U.S.	0.5	0.4	25.0 %	1.8	1.0	80.0 %
Revenue on sales of RITUXAN in the rest of world	21.0	29.3	(28.3)%	22.0	81.1	(72.9)%
Total unconsolidated joint business revenues	\$ 303.2	\$ 287.8	5.4 %	\$ 856.6	\$ 857.0	— %

For the nine months ended September 30, 2013, compared to the same period in 2012, our share of RITUXAN revenues from unconsolidated joint business reflects a charge for damages and interest awarded to Hoechst in Genentech's arbitration with Hoechst. As disclosed in Note 20, *Litigation* to our condensed consolidated financial statements included within this report, Genentech and Hoechst have been arbitrating Hoechst's claims under a license agreement between Hoechst's predecessor and Genentech that was terminated in October 2008. The license agreement provided for royalty payments of 0.5% on net sales of certain products defined by the agreement.

Although we are not a party to the arbitration, we expect the damages to be a cost charged to our collaboration with Genentech. Accordingly, we reduced our share of RITUXAN revenue from unconsolidated joint business by approximately \$41.5 million during the nine months ended September 30, 2013, of which revenue on sales of RITUXAN in the rest of world was reduced by \$37.6 million and co-promotion profits in the U.S. by \$3.9 million.

Biogen Idec's Share of Co-Promotion Profits in the U.S.

The following table provides a summary of amounts comprising our share of pre-tax co-promotion profits in the U.S.:

(In millions, except percentages)	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2013	2012	Change %	2013	2012	Change %
Product revenues, net	\$ 947.5	\$ 786.8	20.4%	\$ 2,622.8	\$ 2,363.0	11.0%
Costs and expenses	155.1	141.5	9.6%	440.2	417.0	5.6%
Pre-tax co-promotion profits in the U.S.	792.4	645.3	22.8%	2,182.6	1,946.0	12.2%
Biogen Idec's share of pre-tax co-promotion profits in the U.S.	\$ 281.7	\$ 258.1	9.1%	\$ 832.8	\$ 774.9	7.5%

For the three and nine months ended September 30, 2013, compared to the same periods in 2012, the increase in U.S. RITUXAN product revenues was primarily due to the recognition of \$94.9 million in net revenues resulting from the July 2013 issuance by the Department of Health and Human Services of its final rule on the Exclusion of Orphan Drugs for Certain Covered Entities Under 340B Program, along with price increases and an increase in commercial demand. Increased commercial demand was approximately 6% and 4%, respectively, in U.S. RITUXAN unit sales volume for the three and nine months ended September 30, 2013, over the prior year comparative periods.

The issuance of the final rule by the Department of Health and Human Services did not have an impact on the amount we recorded as revenues from unconsolidated joint business in our condensed consolidated statements of income because, through June 30, 2013, we had been increasing our share of co-promotion profits in the U.S. to reflect our interpretation of the proposed 340B rule. The final rule was consistent with our prior interpretation.

Under our collaboration agreement, our current pre-tax co-promotion profit-sharing formula, which resets annually, provides for a 40% share of pre-tax co-promotion profits if co-promotion operating profits exceed \$50.0 million. The 40% threshold was met during the first quarter of 2013 and 2012.

Revenue on Sales of RITUXAN in the Rest of the World

Revenue on sales of RITUXAN in the rest of world consists of our share of pre-tax co-promotion profits in Canada and royalty revenue on sales of RITUXAN outside the U.S. and Canada. For the three months ended September 30, 2013, compared to the same period in 2012, revenue on sales of RITUXAN in the rest of world decreased due to the expirations of royalties on a country-by-country basis. For the nine months ended September 30, 2013 compared to the same period in 2012, revenue on sales of RITUXAN in the rest of world decreased as a result of a \$37.6 million charge for damages and interest awarded to Hoechst, as discussed above, as well as the expirations of royalties on a country-by-country basis.

The royalty period for sales in the rest of world with respect to all products is 11 years from the first commercial sale of such product on a country-by-country basis. The royalty periods for substantially all of the remaining royalty-bearing sales of RITUXAN in the rest of world markets expired during 2012.

Other Revenues

Other revenues are summarized as follows:

(In millions, except percentages)	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2013	2012	Change %	2013	2012	Change %
Royalty revenues	\$ 54.2	\$ 46.6	16.3%	\$ 125.1	\$ 112.5	11.2%
Corporate partner revenues	16.8	12.0	40.0%	49.4	37.6	31.4%
Total other revenues	\$ 71.0	\$ 58.6	21.2%	\$ 174.5	\$ 150.1	16.3%

Royalty Revenues

We receive royalties from net sales on products related to patents that we licensed. Our most significant source of royalty revenue is derived from net worldwide sales of ANGIOMAX, which is licensed to The Medicines Company (TMC). Royalty revenues from the net worldwide sales of ANGIOMAX are recognized in an amount equal to the level of net sales achieved during a calendar year multiplied by the royalty rate in effect for that tier under our agreement with TMC. The royalty rate increases based upon which tier of total net sales are earned in any calendar year. During 2012, we amended our agreement with TMC for the period from January 1, 2013 to December 15, 2014 to modestly increase the royalty rate in effect for all tiers. For the three and nine months ended September 30, 2013, compared to the same periods in 2012, the increase in royalty revenues is primarily related to the increase in the royalty rate as well as an increase in the net worldwide sales of ANGIOMAX.

For additional information on our U.S. patent that covers ANGIOMAX, please read the subsection entitled “*Other Revenues – Royalty Revenues*” of the “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” included within our 2012 Form 10-K.

Corporate Partner Revenues

Our corporate partner revenues include amounts earned upon delivery of product under contract manufacturing agreements, revenues related to our arrangement with Samsung Bioepis and Eisai, and supply agreement revenues covering products previously included within our product line that we have sold or exclusively licensed to third parties.

For the three months ended September 30, 2013, compared to the same period in 2012, the increase in corporate partner revenues was primarily due to higher contract manufacturing revenues. For the nine months ended September 30, 2013, compared to the same period in 2012, the increase in corporate partner revenues was primarily due to increased revenue from our biosimilar arrangements and an amendment to our Zevalin supply agreement, which resulted in the delivery of our remaining Zevalin inventory and the recognition of a previously deferred amount. Zevalin is a program we sold in 2007 but have continued to manufacture. As part of the amendment, we have committed to one additional Zevalin manufacturing campaign.

For additional information on our relationship with Samsung Bioepis, please read Note 19, *Collaborative and Other Relationships* to our condensed consolidated financial statements included within this report. For additional information on our relationship with Eisai, please read Note 10, *Property, Plant and Equipment* to our condensed consolidated financial statements included within this report.

Reserves for Discounts and Allowances

Revenues from product sales are recorded net of applicable allowances for trade term discounts, wholesaler incentives, Medicaid rebates, Veterans Administration (VA) and Public Health Service (PHS) discounts, managed care rebates, product returns, and other governmental rebates or applicable allowances including those associated with the implementation of pricing actions in certain international markets where we operate.

Reserves established for these discounts and allowances are classified as reductions of accounts receivable (if the amount is payable to our direct customer) or a liability (if the amount is payable to a party other than our customer). These reserves are based on estimates of the amounts earned or to be claimed on the related sales. Our estimates take into consideration our historical experience, current contractual and statutory requirements, specific known market events and trends, and forecasted customer buying and payment patterns. Actual amounts may ultimately differ from our estimates. If actual results vary, we adjust these estimates, which could have an effect on earnings in the period of adjustment. The estimates we make with respect to these allowances represent the most significant judgments with regard to revenue recognition.

Reserves for discounts, contractual adjustments and returns that reduced gross product revenues are summarized as follows:

(In millions, except percentages)	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2013	2012	Change %	2013	2012	Change %
Discounts	\$ 87.0	\$ 28.6	204.2%	\$ 202.1	\$ 84.2	140.0 %
Contractual adjustments	215.3	133.8	60.9%	542.0	348.1	55.7 %
Returns	5.9	5.1	15.7%	16.9	17.0	(0.6)%
Total allowances	\$ 308.2	\$ 167.5	84.0%	\$ 761.0	\$ 449.3	69.4 %
Gross product revenues	\$ 1,761.8	\$ 1,206.7	46.0%	\$ 4,696.3	\$ 3,540.7	32.6 %
Percent of gross product revenues	17.5%	13.9%		16.2%	12.7%	

As a result of our acquisition of TYSABRI rights from Elan, we began recognizing reserves for discounts and allowances for U.S. TYSABRI revenue in the second quarter of 2013. Prior periods included reserves for discounts and allowances for rest of world TYSABRI revenue and worldwide AVONEX revenue only. In addition, following the start of U.S. commercial sales of TECFIDERA in the second quarter of 2013, we began recognizing reserves for discounts and allowances related to U.S. TECFIDERA revenue. Gross product revenues for the three and nine months ended September 30, 2012 includes sales of TYSABRI to Elan under our collaboration agreement, which did not have any corresponding reserves for discounts and allowances.

Contractual adjustments relate to Medicaid and managed care rebates, VA, PHS discounts and other government rebates or applicable allowances. In addition to the above noted additions of TECFIDERA and U.S. TYSABRI amounts, the increase in contractual adjustments for the three and nine months ended September 30, 2013, compared to the same periods in 2012, was primarily due to an increase in U.S. governmental rebates and allowances as a result of price increases.

Product return reserves are established for returns made by wholesalers. In accordance with contractual terms, wholesalers are permitted to return product for reasons such as damaged or expired product. The majority of wholesaler returns are due to product expiration. Reserves for product returns are recorded in the period the related revenue is recognized, resulting in a reduction to product sales. For the three months ended September 30, 2013 compared to the same period in 2012, return reserves increased primarily due to our acquisition of TYSABRI rights and the FDA approval and start of commercial sales of TECFIDERA, as discussed above. For the nine months ended September 30, 2013 compared to the same period in 2012, return reserves decreased primarily due to returns associated with a voluntary withdrawal of a limited amount of AVONEX product in the first quarter of 2012 that demonstrated a trend in oxidation that may have led to expiry earlier than stated on its label and adjustments to prior quarters' estimates, partially offset by our acquisition of TYSABRI rights and the FDA approval and start of commercial sales of TECFIDERA, as discussed above.

Cost and Expenses

A summary of total cost and expenses is as follows:

(In millions, except percentages)	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2013	2012	Change %	2013	2012	Change %
Cost of sales, excluding amortization of acquired intangible assets	\$ 234.7	\$ 139.4	68.4 %	\$ 599.2	\$ 411.7	45.5 %
Research and development	410.0	304.2	34.8 %	1,021.8	989.7	3.2 %
Selling, general and administrative	405.6	299.6	35.4 %	1,189.2	901.5	31.9 %
Amortization of acquired intangible assets	100.0	53.0	88.6 %	233.5	151.3	54.4 %
Collaboration profit sharing	—	75.5	(100.0)%	85.4	240.0	(64.4)%
(Gain) loss on fair value remeasurement of contingent consideration	(0.1)	9.5	(101.0)%	(3.0)	23.6	(112.7)%
Restructuring charges	—	0.8	(100.0)%	—	2.2	(100.0)%
Total cost and expenses	\$ 1,150.2	\$ 882.0	30.4 %	\$ 3,126.1	\$ 2,719.9	14.9 %

Cost of Sales, Excluding Amortization of Acquired Intangible Assets (Cost of Sales)

(In millions, except percentages)	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2013	2012	Change %	2013	2012	Change %
Product cost of sales	\$ 116.5	\$ 94.7	23.0%	\$ 297.4	\$ 275.8	7.8%
Royalty cost of sales	\$ 118.2	\$ 44.7	164.4%	\$ 301.8	\$ 135.9	122.1%
Total cost of sales	\$ 234.7	\$ 139.4	68.4%	\$ 599.2	\$ 411.7	45.5%

For the three and nine months ended September 30, 2013, compared to the same periods in 2012, the increase in cost of sales was primarily driven by our acquisition of TYSABRI rights. Upon the closing of the transaction, we began recording 100% of cost of sales and third party royalties, which previously were shared with Elan. Our contingent payments due to Elan are also recorded as a component of royalty cost of sales. For additional information on the contingent payments due to Elan, please read Note 2, *Acquisitions* to our condensed consolidated financial statements included within this report. In addition, for the three and nine months ended September 30, 2013, compared to the same periods in 2012, the increase in cost of sales was driven by higher unit sales volume and an increase in charges related to excess, obsolete, unmarketable or other inventory primarily related to the implementation of our plans to supply rest of world markets with TYSABRI manufactured at our Hillerød, Denmark facility, which was approved by the FDA and EMA in July 2013, partially offset by lower production costs and expiration of a third party royalty related to AVONEX.

Inventory amounts written down related to excess, obsolete, unmarketable, or other are charged to cost of sales, and totaled \$17.5 million and \$28.3 million, respectively, for the three and nine months ended September 30, 2013, as compared to \$9.4 million and \$20.0 million, respectively, in the prior year comparative periods.

Research and Development

(In millions, except percentages)	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2013	2012	Change %	2013	2012	Change %
Marketed products	\$ 65.3	\$ 35.8	82.4 %	\$ 169.3	\$ 98.5	71.9 %
Late stage programs	73.0	100.6	(27.4)%	216.6	346.0	(37.4)%
Early stage programs	33.0	22.8	44.7 %	83.5	65.2	28.1 %
Research and discovery	22.0	24.7	(10.9)%	72.3	73.3	(1.4)%
Other research and development costs	136.6	120.2	13.6 %	394.0	363.6	8.4 %
Milestone and upfront payments	80.1	0.1	**	86.1	43.1	99.8 %
Total research and development	\$ 410.0	\$ 304.2	34.8 %	\$ 1,021.8	\$ 989.7	3.2 %

Research and development expense incurred in support of our marketed products includes costs associated with product lifecycle management activities and, if applicable, costs associated with the development of new indications for existing products. Late stage programs are programs in Phase 3 development or in registration stage. Early stage programs are programs in Phase 1 or Phase 2 development. Research and discovery represents costs incurred to support our discovery research and translational science efforts. Other research and development costs consist of indirect costs incurred in support of overall research and development activities and non-specific programs, including activities that benefit multiple programs, such as management costs as well as depreciation and other facility-based expenses.

For the three and nine months ended September 30, 2013, compared to the same periods in 2012, the increase in research and development expense was primarily related to an increase in costs incurred in connection with our marketed products, early stage programs and upfront and milestone payments partially offset by a decrease in costs incurred in connection with our late stage programs. The increase in spending associated with marketed products is related to TECFIDERA, which is now recorded in this caption, and costs associated with TYSABRI, which previously were shared with Elan and are now recorded by us. Research and development expense related to our early stage programs increased over the prior year comparative periods primarily due to costs incurred in the advancement of our Anti-LINGO program in multiple sclerosis, our BIIB037 program for Alzheimer's disease, our Neublabin program for neuropathic pain, and an increase in spending incurred in connection with our development of STX-100 for the treatment of idiopathic pulmonary fibrosis.

In addition, research and development expense for the three and nine months ended September 30, 2013 included a \$75.0 million upfront payment made to Isis Pharmaceuticals, Inc. (Isis) in September 2013 upon entering into a six year research collaboration with Isis under which both companies will perform research and then seek to develop and commercialize antisense or other therapeutics for the treatment of neurological disorders. In the prior year comparative periods, research and development expense included \$29.0 million and \$12.0 million upfront payments made to Isis in January and June 2012 upon entering into an agreement for the development of Isis' antisense investigational drug ISIS-SMNR_x for the treatment of spinal muscular atrophy (SMA) and product candidates related to the treatment of myotonic dystrophy (DM1), respectively, in the prior year comparative periods.

The decrease in spending associated with our late stage product candidates was driven by the discontinuation of dexpramipexole, decreased clinical trial activity associated with our ELOCTATE and ALPROLIX product candidates, as these clinical trials concluded in 2012, and the FDA approval of TECFIDERA in the U.S. during the first quarter of 2013.

We intend to continue committing significant resources to targeted research and development opportunities where there is a significant unmet need and where the drug candidate has the potential to be highly differentiated. Specifically, we intend to continue to invest in bringing forward our MS pipeline and in pursuing additional therapies for autoimmune disorders, neurodegenerative diseases and hemophilia as well as make investments to enhance our early stage pipeline.

Selling, General and Administrative

(In millions, except percentages)	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2013	2012	Change %	2013	2012	Change %
Selling, general and administrative	\$ 405.6	\$ 299.6	35.4%	\$ 1,189.2	\$ 901.5	31.9%

For the three and nine months ended September 30, 2013, compared to the same periods in 2012, the increase in selling, general and administrative expense was primarily driven by costs associated with developing commercial capabilities for the product launch of TECFIDERA and the potential product launches of ELOCTATE and ALPROLIX, and an increase in sales and marketing activities in support of AVONEX and TYSABRI. The increase in sales and marketing activities in support of TYSABRI were primarily driven by assuming 100% responsibility of activities as a result of the acquisition of TYSABRI rights. The successful commercialization of potential new products requires significant investments, such as sales force build and development, training, and other related activities. In addition, the increase in selling, general, and administrative expense was driven by an increase in share-based compensation expense.

We remain focused on preparing for multiple potential product launches in the coming years. As discussed above, we continue to invest in the development of commercial capabilities in support of our TECFIDERA program, which was recently approved and is in the early stages of commercial launch. We also have continued to make investments in the development of commercial capabilities for our hemophilia franchise.

Amortization of Acquired Intangible Assets

(In millions, except percentages)	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2013	2012	Change %	2013	2012	Change %
Amortization of acquired intangible assets	\$ 100.0	\$ 53.0	88.6%	\$ 233.5	\$ 151.3	54.4%

For the three and nine months ended September 30, 2013, compared to the same periods in 2012, the change in amortization of acquired intangible assets was primarily driven by our acquisition of TYSABRI rights from Elan on April 2, 2013 and an increase in the amount of amortization recorded in relation to our AVONEX core technology asset.

We amortize the intangible assets related to the acquired TYSABRI rights as well as the core technology of our AVONEX product using the economic consumption method based on revenue generated from the products underlying the related intangible assets. An analysis of the anticipated lifetime revenues of TYSABRI and AVONEX is performed annually during our long range planning cycle which is generally updated in the third quarter of each year, and this analysis serves as the basis for the calculation of our economic consumption models used for these products. This analysis is based upon certain assumptions that we evaluate on a periodic basis, such as the anticipated product sales of AVONEX and TYSABRI, the expected impact of competitor products and our own pipeline product candidates including TECFIDERA and PLEGRIDY, and the issuance of new patents or the extension of existing patents.

Our most recent long range planning cycle was completed in the third quarter of 2013, which reflected a decrease in the expected future product revenues of AVONEX and TYSABRI, resulting in an increase in amortization expense as compared to prior quarters. The results of our analysis were impacted by changes in the estimated impact of TECFIDERA, as well as other oral and alternative formulations including PLEGRIDY that may compete with AVONEX and TYSABRI.

We monitor events and expectations regarding product performance. If there are any indications that the assumptions underlying our most recent analysis would be different than those utilized within our current estimates, our analysis would be updated and may result in a significant change in the anticipated lifetime revenues of AVONEX and TYSABRI. The occurrence of an adverse event could substantially increase the amount of amortization expense associated with our acquired intangible assets as compared to previous periods or our current expectations, which may result in a significant negative impact on our future results of operations.

Collaboration Profit Sharing

(In millions, except percentages)	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2013	2012	Change %	2013	2012	Change %
Collaboration profit sharing	\$ —	\$ 75.5	(100.0)%	\$ 85.4	\$ 240.0	(64.4)%

Upon the closing of our acquisition of TYSABRI rights, our collaboration agreement was terminated and we no longer record collaboration profit sharing.

(Gain) Loss on Fair Value Remeasurement of Contingent Consideration

(In millions, except percentages)	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2013	2012	Change %	2013	2012	Change %
(Gain) loss on fair value remeasurement of contingent consideration	\$ (0.1)	\$ 9.5	(101.0)%	\$ (3.0)	\$ 23.6	(112.7)%

The consideration for certain of our business combinations includes future payments that are contingent upon the occurrence of a particular factor or factors. For business combinations completed after January 1, 2009, we record a contingent consideration obligation for such contingent consideration payments at its fair value on the acquisition date. We revalue our acquisition-related contingent consideration obligations each reporting period. Changes in the fair value of our contingent consideration obligations, other than changes due to payments, are recognized as a (gain) loss on fair value remeasurement of contingent consideration within our condensed consolidated statements of income. The (gain) loss for the three and nine months ended September 30, 2013, compared to the same periods in 2012 was primarily due to changes in the probability and expected timing related to the achievement of certain developmental milestones and changes in the discount rate.

Gain on Sale of Rights

(In millions, except percentages)	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2013	2012	Change %	2013	2012	Change %
Gain on sale of rights	\$ 6.9	\$ 31.7	(78.1)%	\$ 17.3	\$ 31.7	(45.4)%

During the third quarter of 2012, we sold all of our rights, including rights to royalties, related to BENLYSTA (belimumab) to a DRI Capital managed fund (DRI). We were entitled to these rights pursuant to a license agreement with Human Genome Sciences, Inc. and GlaxoSmithKline plc (collectively the Licensees). Under the terms of the BENLYSTA sale agreement, we will receive payments equal to a multiple of royalties payable by the Licensees for the period covering October 2011 to September 2014 and a one-time contingency payment that could be paid to us if the cumulative royalties over the full royalty term exceed an agreed amount.

For the three and nine months ended September 30, 2013, compared to the same periods in 2012, we recognized lower royalties on the sales of BENLYSTA resulting from a lower multiple of sales being applied in 2013 as compared to 2012. The payments received during the three and nine months ended September 30, 2013 covered the royalty period from October 1, 2012 to June 30, 2013 while payments received during the three and nine months ended September 30, 2012 covered the royalty period of October 1, 2011 to June 30, 2012. The remaining payments, which are contingent upon BENLYSTA sales over the period ending September 2014, will be recognized as the payments become due. For additional information related to this transaction, please read Note 4, *Gain on Sale of Rights* to our consolidated financial statements included within our 2012 Form 10-K.

Other Income (Expense), Net

(In millions, except percentages)	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2013	2012	Change %	2013	2012	Change %
Other income (expense), net	\$ (4.6)	\$ (4.5)	(2.0)%	\$ (29.5)	\$ 13.5	(318.0)%

For the three months ended September 30, 2013 compared to the same period in 2012, the change in other income (expense), net was due to an increase in realized gains recognized on our strategic investments offset by a decrease in interest income due to lower average cash, cash equivalent and marketable securities balances and higher foreign exchange losses. For the nine months ended September 30, 2013, compared to the same period in 2012, the change in other income (expense), net was due to a decrease in interest income due to lower average cash, cash equivalent and marketable securities balances, higher non-income based taxes and higher foreign exchange losses. Other income (expense), net for the nine months ended September 30, 2012 included a gain of \$9.0 million recognized upon our acquisition of Stromedix in March 2012, which was based on the value derived from the purchase price of our equity interest held in Stromedix prior to its acquisition.

Income Tax Provision

(In millions, except percentages)	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2013	2012	Change %	2013	2012	Change %
Effective tax rate on pre-tax income	27.4%	24.7%	10.9%	22.5%	23.5%	(4.3)%
Income tax expense	\$ 186.1	\$ 131.0	42.0%	\$ 410.8	\$ 334.2	22.9 %

Our effective tax rate fluctuates from year to year due to the global nature of our operations. The factors that most significantly impact our effective tax rate include variability in the allocation of our taxable earnings among multiple jurisdictions, changes in tax laws, the amount and characterization of our research and development expenses, acquisitions, and licensing transactions.

The increase in our tax rate for the three months ended September 30, 2013 compared to the same period in 2012, is primarily attributable to the commercial launch of TECFIDERA in the United States, which has resulted in a higher relative percentage of our earnings being recognized in the U.S., a higher tax jurisdiction. In addition, in 2013 we are recognizing reduced expenditures eligible for the orphan drug credit and higher state taxes. These factors were partially offset by lower intercompany royalties owed by a foreign wholly owned subsidiary to a U.S. wholly owned subsidiary on the international sales of one of our products.

For the nine months ended September 30, 2013, the reduction in our income tax rate compared to the same period in 2012, was primarily the result of a change in our uncertain tax position related to our U.S. federal manufacturing deduction, described below, lower intercompany royalties owed by a foreign wholly owned subsidiary to a U.S. wholly owned subsidiary on the international sales of one of our products and the reinstatement of the federal research and development tax credit. These favorable items were partially offset by higher relative earnings in the United States from the commercial launch of TECFIDERA, lower orphan drug credits due to reduced expenditures in eligible clinical trials and higher state taxes.

During the nine months ended September 30, 2013, we recorded a deferred charge of \$203.7 million in connection with an intercompany transfer of the intellectual property for Daclizumab. The deferred charge will be amortized to income tax expense over the economic life of the Daclizumab program. If the Daclizumab program were to be discontinued, we will accelerate the amortization of this deferred charge and record an expense equal to its remaining net book value.

Accounting for Uncertainty in Income Taxes

During the three months ended March 31, 2013, we received updated technical guidance from the IRS concerning our current and prior year filings and calculation of our U.S. federal manufacturing deduction related to our unconsolidated joint business. Based on this guidance we reevaluated the level of our unrecognized benefits, related to uncertain tax positions, and recorded a \$33.0 million benefit, which is net of ancillary federal and state tax effects. This benefit is for a previously unrecognized position and relates to years 2005 through 2012 and is net of a \$10.0 million expense for non-income based state taxes, which is recorded in other income (expense) within our condensed consolidated statements of income. Subsequent to establishing the uncertain tax position, we have remeasured the uncertain tax position upon receiving new information and recorded a net benefit of approximately \$7.0 million.

For more information on the U.S. federal manufacturing deduction, our state tax matter and a detailed income tax rate reconciliation for the three and nine months ended September 30, 2013 and 2012, please read Note 16, *Income Taxes* to our condensed consolidated financial statements included within this report.

Equity in Loss of Investee, Net of Tax

(In millions, except percentages)	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2013	2012	Change %	2013	2012	Change %
Equity in loss of investee, net of tax	\$ 6.2	\$ 1.3	390.5%	\$ 12.3	\$ 1.8	593.6%

In February 2012, we finalized an agreement with Samsung BioLogics that established an entity, Samsung Bioepis, to develop, manufacture and market biosimilar pharmaceuticals. We account for this investment under the equity method of accounting. We recognize our share of the results of operations related to our investment in Samsung Bioepis one quarter in arrears. For the three and nine months ended September 30, 2013, compared to the same periods in 2012, the increase in equity in loss of investee, net of tax was due to increased clinical trial activity. For additional information related to this transaction, please read Note 19, *Collaborative and Other Relationships* to our condensed consolidated financial statements included within this report.

Market Risk

We conduct business globally. As a result, our international operations are subject to certain opportunities and risks which may affect our results of operations, including volatility in foreign currency exchange rates or weak economic conditions in the foreign markets in which we operate.

Foreign Currency Exchange Risk

Our results of operations are subject to foreign currency exchange rate fluctuations due to the global nature of our operations. While the financial results of our global activities are reported in U.S. dollars, the functional currency for most of our foreign subsidiaries is their respective local currency. Fluctuations in the foreign currency exchange rates of the countries in which we do business will affect our operating results, often in ways that are difficult to predict.

Our net income may also fluctuate due to the impact of our foreign currency hedging program, which is designed to mitigate, over time, a portion of the impact resulting from volatility in exchange rate changes on revenues. We use foreign currency forward contracts to manage foreign currency risk with the majority of our forward contracts used to hedge certain forecasted revenue transactions denominated in foreign currencies in the next 15 months. For a more detailed disclosure of our hedges outstanding, please read Note 9, *Derivative Instruments* to our condensed consolidated financial statements included within this report. Our ability to mitigate the impact of exchange rate changes on revenues and net income diminishes as significant exchange rate fluctuations are sustained over extended periods of time. Other foreign currency gains or losses arising from our operations are recognized in the period in which we incur those gains or losses.

Pricing Pressure

Governments in a number of international markets in which we operate, including Germany, France, Italy, the United Kingdom, Portugal and Spain, have announced or implemented measures aimed at reducing healthcare costs to constrain the overall level of government expenditures. These implemented measures vary by country and include, among other things, mandatory rebates and discounts, price reductions and suspensions on pricing increases on pharmaceuticals. Certain implemented measures negatively impacted our revenues in 2012 and have continued to do so during the three and nine months ended September 30, 2013. Based upon our most recent estimates, we expect that such measures will reduce our revenues in 2013 by approximately \$50.0 to \$60.0 million, excluding any consideration of our agreement in principle with AIFA in Italy. For additional information relating to our agreement in principle with AIFA, please read Note 3, *Accounts Receivable* to our condensed consolidated financial statements included in this report.

In addition, certain countries set prices by reference to the prices in other countries where our products are marketed. Thus, our inability to secure adequate prices in a particular country may impair our ability to obtain acceptable prices in existing and potential new markets and limit market growth. The continued implementation of pricing actions throughout Europe may also lead to higher levels of parallel trade.

Generally, in the United States there are fewer government-imposed constraints on the pricing of pharmaceuticals. However, given current trends in health care costs, we expect increased focus on overall health care expenditures in 2013 and beyond that may result in, among other things, constraints on pharmaceutical pricing, changes in level of rebates and other reimbursement mechanisms, the permissibility of cross-border trade, and the use of comparative effectiveness research.

On March 1, 2013, the across-the-board U.S. federal government spending cuts, known as “sequestration”, went into effect. These reductions included a 2% reduction in Medicare reimbursements rates to providers, such as physicians, hospitals and drug plans. These cuts, which reduce payments to health care providers for Part B drugs, could affect decisions regarding prescribing patterns or site of care, which could adversely impact sales of our products such as our infusible drugs, TYSABRI and RITUXAN. In addition, Part D plans managing outpatient prescription drugs that are receiving less reimbursement from the government could seek further discounts from manufacturers, which could adversely affect our sales of our Part D drugs, such as AVONEX and TECFIDERA.

In the context of ongoing discussions to reduce the federal budget deficit, additional proposals that have been raised to address government finances include changes to the Medicare program, such as implementation of mandatory Part D rebates for dual-eligible beneficiaries, increased co-payments, reductions in premium subsidies, increases to the pharmaceutical fee, changes to the coverage gap and further reductions in physician payments for Part B drugs. If enacted, these changes to current policy, together with continuing federal budget cuts, could result in increased pricing pressure and reduced reimbursement for our products, which could have a material impact on our financial position or results of operations.

Credit Risk

We are subject to credit risk from our accounts receivable related to our product sales. The majority of our accounts receivable arise from product sales in the U.S. and Europe with concentrations of credit risk limited due to the wide variety of customers and markets using our products, as well as their dispersion across many different geographic areas. Our accounts receivable are primarily due from wholesale distributors, public hospitals and other government entities. We monitor the financial performance and credit worthiness of our large customers so that we can properly assess and respond to changes in their credit profile. We operate in certain countries where weakness in economic conditions has resulted in extended collection periods. We continue to monitor these conditions, including the volatility associated with international economies and the relevant financial markets, and assess their possible impact on our business. Our historical write-offs of accounts receivable have not been significant.

Although our contractual payment terms have not changed, over the past two years we noted greater volatility in the amount and timing of collections of accounts receivable balances in certain countries. In countries where we have experienced a pattern of extended payments and we expect to collect receivables greater than one year from the time of sale, we have discounted our receivables and reduced related revenues over the period of time that we estimate those amounts will be paid using the country’s market-based borrowing rate for such period. The related receivables are classified at the time of sale as long-term assets.

Within the European Union, our accounts receivable in Spain, Italy and Portugal continue to be subject to significant payment delays due to government funding and reimbursement practices. Uncertain credit and economic conditions have generally led to a lengthening of time to collect our accounts receivable in these countries, although these countries have introduced programs to pay down significantly overdue payables. Specifically during the third quarter of 2012, Portugal enacted legislation to limit their total expenditure on pharmaceutical products. In recognizing revenue in Portugal, we have estimated the effect of these provisions in determining our price. Our net accounts receivable balances from product sales in Italy, Portugal and Spain totaled \$234.6 million and \$207.5 million as of September 30, 2013 and December 31, 2012, respectively, of which \$38.8 million and \$17.6 million were classified as non-current and included within investments and other assets within our condensed consolidated balance sheets as of those dates. Approximately \$40.8 million and \$11.8 million of the total net accounts receivable balances for these three countries were overdue more than one year as of September 30, 2013 and December 31, 2012, respectively.

We believe that our allowance for doubtful accounts was adequate as of September 30, 2013 and December 31, 2012, respectively. However, if significant changes occur in the availability of government funding or the reimbursement practices of these or other governments, we may not be able to collect on amounts due to us from customers in such countries and our results of operations could be adversely affected.

Financial Condition and Liquidity

Our financial condition is summarized as follows:

(In millions, except percentages)	As of September 30, 2013	As of December 31, 2012	Change %
Financial assets:			
Cash and cash equivalents	\$ 427.8	\$ 570.7	(25.0)%
Marketable securities — current	240.9	1,135.0	(78.8)%
Marketable securities — non-current	373.6	2,036.7	(81.7)%
Total cash, cash equivalents and marketable securities	<u>\$ 1,042.3</u>	<u>\$ 3,742.4</u>	<u>(72.1)%</u>
Borrowings:			
Current portion of notes payable and line of credit	\$ 3.4	\$ 453.4	(99.3)%
Notes payable and other financing arrangements	694.9	687.4	1.1 %
Total borrowings	<u>\$ 698.3</u>	<u>\$ 1,140.8</u>	<u>(38.8)%</u>
Working Capital:			
Current assets	\$ 2,643.7	\$ 3,244.3	(18.5)%
Current liabilities	(1,518.7)	(1,657.4)	(8.4)%
Total working capital	<u>\$ 1,125.0</u>	<u>\$ 1,586.9</u>	<u>(29.1)%</u>

For the nine months ended September 30, 2013, certain significant cash flows were as follows:

- \$2.6 billion in net proceeds received on sales and maturities of marketable securities;
- \$3.25 billion used for our acquisition of TYSABRI rights from Elan;
- \$450.0 million used for the repayment of principal of our 6.0% Senior Notes;
- \$414.5 million in total payments for income taxes;
- \$400.3 million used for share repurchases;
- \$167.6 million used for purchases of property, plant and equipment; and
- \$100.0 million upfront payment made to Isis pursuant to our collaboration agreement dated September 2013.

For the nine months ended September 30, 2012, certain significant cash flows were as follows:

- \$133.2 million in cash collections on accounts receivable balances in Spain and Portugal;
- \$963.2 million used for share repurchases;
- \$364.6 million in total payments for income taxes;
- \$279.0 used for net purchases of marketable securities;
- \$185.5 million used for purchases of property, plant and equipment;
- \$72.4 million of net cash paid for the acquisition of Stromedix, Inc.; and
- \$41.0 million upfront payments made to Isis, recognized as research and development expense, pursuant to our collaboration agreements dated January and June 2012.

We have historically financed our operating and capital expenditures primarily through cash flows earned through our operations. We expect to continue funding our current and planned operating requirements principally through our cash flows from operations, as well as our existing cash resources. We believe that our existing funds, when combined with cash generated from operations and our access to additional financing resources, if needed, are sufficient to satisfy our operating, working capital, strategic alliance, milestone payment, capital expenditure and debt service requirements for the foreseeable future. In addition, we may choose to opportunistically return cash to shareholders and pursue other business initiatives, including acquisition and licensing activities. We may, from time to time, also seek additional funding through a combination of new collaborative agreements, strategic alliances and additional equity and debt financings or from other sources should we identify a significant new opportunity.

We consider the unrepatriated cumulative earnings of certain of our foreign subsidiaries to be invested indefinitely outside the U.S. During 2013, we completed our acquisition of TYSABRI rights using cash primarily located outside the U.S. Of the total cash, cash equivalents and marketable securities at September 30, 2013, approximately \$240.0 million was generated from operations in foreign jurisdictions and is intended for use in our foreign operations or in connection with business development transactions outside of the U.S. In managing our day-to-day liquidity in the U.S., we do not rely on the unrepatriated earnings as a source of funds and we have not provided for U.S. federal or state income taxes on these undistributed foreign earnings.

For additional information related to certain risks that could negatively impact our financial position or future results of operations, please read the “*Risk Factors*” and “*Quantitative and Qualitative Disclosures About Market Risk*” sections of this report.

Share Repurchase Programs

In February 2011, our Board of Directors authorized the repurchase of up to 20.0 million shares of common stock. This authorization does not have an expiration date. During the nine months ended September 30, 2013, we repurchased approximately 2.0 million shares at a cost of \$400.3 million. Of those shares, 1.7 million were repurchased during the three months ended September 30, 2013 at a cost of \$359.3 million. During the nine months ended September 30, 2012, we repurchased approximately 7.7 million shares at a cost of approximately \$963.2 million.

Approximately 4.2 million shares of our common stock remain available for repurchase under the 2011 authorization.

Cash, Cash Equivalents and Marketable Securities

Until required for another use in our business, we typically invest our cash reserves in bank deposits, certificates of deposit, commercial paper, corporate notes, U.S. and foreign government instruments and other interest bearing marketable debt instruments in accordance with our investment policy. It is our policy to mitigate credit risk in our cash reserves and marketable securities by maintaining a well-diversified portfolio that limits the amount of exposure as to institution, maturity, and investment type. We also limit our exposure to European sovereign debt securities and maintain no holdings with respect to certain euro-zone states, such as Portugal, Italy and Spain. The value of our investments, however, may be adversely affected by increases in interest rates, downgrades in the credit rating of the corporate bonds included in our portfolio, instability in the global financial markets that reduces the liquidity of securities included in our portfolio, and by other factors which may result in declines in the value of the investments. Each of these events may cause us to record charges to reduce the carrying value of our investment portfolio if the declines are other-than-temporary or sell investments for less than our acquisition cost which could adversely impact our financial position and our overall liquidity.

The decrease in cash, cash equivalents and marketable securities from December 31, 2012 is primarily due to our acquisition of TYSABRI rights from Elan and the repayment of principal of our 6.0% Senior Notes partially offset by net proceeds from sales and maturities of marketable securities and net cash flows provided by operating activities.

Borrowings

In March 2013, we entered into a \$750.0 million senior unsecured revolving credit facility, which we may choose to use for working capital and general corporate purposes. The terms of this revolving credit facility include a financial covenant that requires us to not exceed a maximum debt to EBITDA ratio. This facility terminates in March 2014. As of September 30, 2013, we had no outstanding borrowings and were in compliance with all covenants under this facility.

On March 1, 2013, we repaid the \$450.0 million principal amount of our 6.0% Senior Notes.

We have \$550.0 million aggregate principal amount of 6.875% Senior Notes due March 1, 2018 that were originally priced at 99.184% of par. The discount is amortized as additional interest expense over the period from issuance through maturity.

In connection with our 2006 distribution agreement with Fumedica, we issued notes totaling 61.4 million Swiss Francs which were payable to Fumedica in varying amounts from June 2008 through June 2018. Our remaining note payable to Fumedica had a present value of 13.8 million Swiss Francs (\$15.3 million) and 16.4 million Swiss Francs (\$17.9 million) as of September 30, 2013 and December 31, 2012, respectively.

For a summary of the fair and carrying values of our outstanding borrowings as of September 30, 2013 and December 31, 2012, please read Note 7, *Fair Value Measurements* to our condensed consolidated financial statements included within this report.

Working Capital

We define working capital as current assets less current liabilities. The decrease in working capital from December 31, 2012 reflects a decrease in total current assets of \$600.6 million partially offset by a decrease in total current liabilities of \$138.7 million. The decrease in total current assets was primarily driven by our acquisition of TYSABRI rights from Elan partially offset by an increase in inventory related to our AVONEX, TYSABRI, and ELOCTATE programs and accounts receivable resulting from increased product revenue. The decrease in total current liabilities primarily resulted from the repayment of our 6.0% Senior Notes on March 1, 2013 partially offset by an increase in taxes payable and accrued expenses and other.

Cash Flows

The following table summarizes our cash flow activity:

(In millions, except percentages)	For the Nine Months Ended September 30,		
	2013	2012	% Change
Net cash flows provided by operating activities	\$ 1,476.1	\$ 1,372.0	7.6 %
Net cash flows used in investing activities	\$ (894.7)	\$ (574.9)	55.6 %
Net cash flows used in financing activities	\$ (727.7)	\$ (862.0)	(15.6)%

Operating Activities

Cash flows from operating activities represent the cash receipts and disbursements related to all of our activities other than investing and financing activities. We expect cash provided from operating activities will continue to be our primary source of funds to finance operating needs and capital expenditures for the foreseeable future.

Operating cash flow is derived by adjusting our net income for:

- Non-cash operating items such as depreciation and amortization, impairment charges and share-based compensation charges;
- Changes in operating assets and liabilities which reflect timing differences between the receipt and payment of cash associated with transactions and when they are recognized in results of operations; and
- Changes associated with the fair value of contingent milestones associated with our acquisitions of businesses and payments related to collaborations.

For the nine months ended September 30, 2013, compared to the same period in 2012, the increase in cash provided by operating activities is primarily driven by an increase in net income partially offset by an increase in inventory related to our AVONEX, TYSABRI, and ELOCTATE programs and accounts receivable resulting from increased product revenue.

Investing Activities

For the nine months ended September 30, 2013, compared to the same period in 2012, the increase in net cash flows used in investing activities is primarily due to our acquisition of TYSABRI rights from Elan and upfront payment made to Isis, partially offset by net proceeds from sales and maturities of marketable securities.

Financing Activities

For the nine months ended September 30, 2013, compared to the same period in 2012, the decrease in net cash flows used in financing activities is primarily due to a decrease in the amount of our common stock we repurchased partially offset by the repayment of principal of our 6.0% Senior Notes.

Contractual Obligations and Off-Balance Sheet Arrangements

Contractual Obligations

Our contractual obligations primarily consist of our obligations under non-cancellable operating leases, our notes payable and line of credit, and defined benefit and other purchase obligations, excluding amounts related to tax related obligations, certain funding commitments, contingent milestone payments, contingent consideration, our financing arrangement for the construction of the office buildings located in Cambridge, Massachusetts and other off-balance sheet arrangements as described below.

For changes related to our notes payable and line of credit, please read the subsection entitled “*Financial Condition and Liquidity - Borrowings*” of this “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*.”

On October 7, 2013, we amended the lease related to our biologics manufacturing facility located in Cambridge, Massachusetts to extend the term of the lease to 2024. In addition, we agreed to two remaining option periods of 5 years each. We are committed to make payments related to this lease of approximately \$30.0 million for the extended term of the lease.

There have been no other material changes in our contractual obligations since December 31, 2012.

Tax Related Obligations

We exclude liabilities pertaining to uncertain tax positions from our summary of contractual obligations as we cannot make a reliable estimate of the period of cash settlement with the respective taxing authorities. As of September 30, 2013, we have approximately \$68.1 million of liabilities associated with uncertain tax positions.

Other Funding Commitments

During the three months ended September 30, 2013, we contributed the remaining 6.5 billion South Korean won (approximately \$5.8 million) to Samsung Bioepis to complete our obligation to contribute an aggregate of approximately 49.5 billion South Korean won (approximately \$45.0 million) for our 15 percent ownership interest. For additional information related to our relationship with Samsung Bioepis, please read Note 19, *Collaborative and Other Relationships* to our condensed consolidated financial statements included within this report.

As of September 30, 2013, we have funding commitments of up to approximately \$9.5 million as part of our investment in biotechnology oriented venture capital funds.

As of September 30, 2013, we have several on-going clinical studies in various clinical trial stages. Our most significant clinical trial expenditures are to clinical research organizations (CROs). The contracts with CROs are generally cancellable, with notice, at our option. We have recorded accrued expenses of approximately \$29.4 million on our condensed consolidated balance sheet for expenditures incurred by CROs as of September 30, 2013. We have approximately \$413.4 million in cancellable future commitments based on existing CRO contracts as of September 30, 2013.

Contingent Development Milestone Payments

Based on our development plans as of September 30, 2013, we have committed to make potential future milestone payments to third parties of up to approximately \$1.5 billion as part of our various collaborations, including licensing and development programs. Payments under these agreements generally become due and payable only upon achievement of certain development, regulatory or commercial milestones. Because the achievement of these milestones had not occurred as of September 30, 2013, such contingencies have not been recorded in our financial statements.

We anticipate that we may pay approximately \$13.3 million of milestone payments, including a \$10.0 million milestone payment to Isis related to the selection and advancement of ISIS-DMPK_{Rx} to treat myotonic dystrophy type 1 (DM1), during the remainder of 2013, provided various development, regulatory or commercial milestones are achieved. Amounts related to contingent milestone payments are not considered contractual obligations as they are contingent on the successful achievement of certain development, regulatory approval and commercial milestones. These milestones may not be achieved.

Contingent Payments

On April 2, 2013, we acquired full ownership of, and strategic, commercial and decision-making rights to, TYSABRI from Elan. Under the terms of the acquisition agreement, we continued to share TYSABRI profits with Elan on an equal basis until April 30, 2013. We recorded this profit split for the month ended April 30, 2013 as cost of sales within our condensed consolidated statements of income as we controlled TYSABRI effective April 2, 2013. Commencing May 1, 2013 and for the first twelve months thereafter, we will make contingent payments to Elan on 12% of worldwide net sales of TYSABRI and, thereafter, 18% on annual worldwide net sales up to \$2.0 billion and 25% on annual worldwide net sales that exceed \$2.0 billion. In 2014, the \$2.0 billion threshold will be pro-rated for the portion of 2014 remaining after the first 12 months expires. Royalty payments to Elan will be recognized as cost of sales within our condensed consolidated statements of income.

Contingent Consideration

In connection with our purchase of the noncontrolling interests in our joint venture investments in Biogen Dompé SRL and Biogen Dompé Switzerland GmbH and our acquisitions of Stromedix, Biogen Idec International Neuroscience GmbH and Biogen Idec Hemophilia Inc., we agreed to make additional payments of up to approximately \$1.0 billion based upon the achievement of certain milestone events. These milestones may not be achieved.

As the acquisitions of the noncontrolling interests in our joint venture investments and our acquisitions of Stromedix and Biogen Idec International Neuroscience GmbH occurred after January 1, 2009, we record contingent consideration liabilities at their fair value on the acquisition date and revalue these obligations each reporting period. Payments made in relation to Biogen Idec Hemophilia Inc. will be capitalized as an intangible asset when the related milestones are achieved. For additional information related to these transactions please read Note 2, *Acquisitions*, to our consolidated financial statements included within our 2012 Form 10-K.

In 2006, we acquired Fumapharm AG. As part of this acquisition we acquired FUMADERM and TECFIDERA (together, Fumapharm Products). We paid \$220.0 million upon closing of the transaction and agreed to pay an additional \$15.0 million if a Fumapharm Product is approved for MS in the U.S. or E.U. In the second quarter of 2013, we paid this \$15.0 million contingent payment as TECFIDERA was approved in the U.S. for MS by the FDA. We are also required to make the following additional milestone payments to former shareholders of Fumapharm AG based on the attainment of certain cumulative sales levels of Fumapharm Products and the level of total net sales of Fumapharm Products in the prior twelve month period, as defined in the acquisition agreement:

Prior 12 Month Sales	Cumulative Sales Level				
	\$500M	\$1.0B	\$2.0B	\$3.0B	Each additional \$1.0B up to \$20.0B
	Payment Amount (In millions)				
< \$500 million	\$ —	\$ —	\$ —	\$ —	\$ —
\$500 million - \$1.0 billion	22.0	25.0	50.0	50.0	50.0
\$1.0 billion - \$1.5 billion	—	50.0	100.0	100.0	100.0
\$1.5 billion - \$2.0 billion	—	—	150.0	150.0	150.0
\$2.0 billion - \$2.5 billion	—	—	200.0	200.0	200.0
\$2.5 billion - \$3.0 billion	—	—	—	250.0	250.0
> \$3.0 billion	—	—	—	—	300.0

For example, if we reach the \$1.0 billion cumulative sales level related to the Fumapharm Products in 20XX and our prior twelve month sales of the related products were between \$500.0 million and \$1.0 billion, then we will owe a \$25.0 million milestone payment, and no further milestone payments will be required to be paid until such time as cumulative sales reach the next applicable cumulative sales level, or \$2.0 billion in this example. These payments will be accounted for as an increase to goodwill as incurred, in accordance with the accounting standard applicable to business combinations when we acquired Fumapharm. Any portion of the payment which is tax deductible will be recorded as a reduction to goodwill. Payments are due within 60 days following the end of the quarter in which the applicable cumulative sales level has been reached. We expect the \$25.0 million milestone payment to be earned in 2013.

Financing Arrangement

In July 2011, we executed leases for two office buildings to be constructed in Cambridge, Massachusetts with a planned occupancy during the second half of 2013. Construction of these facilities began in late 2011. In accordance with accounting guidance applicable to entities involved with the construction of an asset that will be leased when the construction is completed, we are considered the owner of these properties during the construction period. Accordingly, we recorded an asset along with a corresponding financing obligation on our condensed consolidated balance sheet for the amount of total project costs incurred related to the construction in progress for these buildings.

In July 2013, the construction of one of the two buildings was completed and we started leasing the facility. Upon completion of the construction of the building, we determined as part of a normal process that we are no longer considered the owner of that building because we do not have any unusual or significant continuing involvement. Consequently, we derecognized the building and its associated financing obligation of approximately \$47.7 million from our condensed consolidated balance sheet. The derecognition of the building and its associated financing obligation constitute non-cash investing and financing transactions in the amount of \$47.7 million. Upon completion of the second building, we will perform a similar assessment and determine if the remaining asset and corresponding financing obligation should also be derecognized. As of September 30, 2013 and December 31, 2012, the amounts recorded within our condensed consolidated balance sheet as property, plant and equipment and financing obligation totaled approximately \$101.3 million and \$86.5 million, respectively.

Other Off-Balance Sheet Arrangements

We do not have any relationships with entities often referred to as structured finance or special purpose entities that were established for the purpose of facilitating off-balance sheet arrangements. As such, we are not exposed to any financing, liquidity, market or credit risk that could arise if we had engaged in such relationships. We consolidate variable interest entities if we are the primary beneficiary.

New Accounting Standards

For a discussion of new accounting standards please read Note 1, *Summary of Significant Accounting Policies - New Accounting Pronouncements* to our consolidated financial statements included within our 2012 Form 10-K.

Critical Accounting Estimates

The preparation of our condensed consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the U.S. (U.S. GAAP), requires us to make estimates, judgments and assumptions that may affect the reported amounts of assets, liabilities, equity, revenues and expenses, and related disclosure of contingent assets and liabilities. We base our estimates on historical experience and on various other assumptions that we believe are reasonable, the results of which form the basis for making judgments about the carrying values of assets and liabilities. We evaluate our estimates, judgments and assumptions on an ongoing basis. Actual results may differ from these estimates under different assumptions or conditions.

Within our 2012 Form 10-K, we note that sales of TYSABRI in the U.S. are recognized on the “sell-through” model, that is, upon shipment of the product by Elan to its third party distributor rather than upon shipment to Elan. As a result of our acquisition of TYSABRI rights from Elan on April 2, 2013, we began recognizing sales of TYSABRI in the U.S. when title and risk of loss passed to the same third party distributor.

For a discussion of our critical accounting estimates, please read Part II, Item 7 “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” of our 2012 Form 10-K.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Our market risks, and the ways we manage them, are summarized in Part II, Item 7A, “*Quantitative and Qualitative Disclosures About Market Risk*” of our 2012 Form 10-K. There have been no material changes in the first nine months of 2013 to our market risks or to our management of such risks.

Item 4. Controls and Procedures

Disclosure Controls and Procedures and Internal Control over Financial Reporting

Controls and Procedures

We have carried out an evaluation, under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended), as of September 30, 2013. Based upon that evaluation, our principal executive officer and principal financial officer concluded that, as of the end of the period covered by this report, our disclosure controls and procedures are effective in ensuring that (a) the information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms, and (b) such information is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure. In designing and evaluating our disclosure controls and procedures, our management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and our management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting during the quarter ended September 30, 2013 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Part II — OTHER INFORMATION

Item 1. *Legal Proceedings*

Please refer to Note 20, *Litigation* to our condensed consolidated financial statements included within this report, which is incorporated into this item by reference.

Item 1A. *Risk Factors*

We are substantially dependent on revenues from our four principal products.

Our current and future revenues depend upon continued sales of our four principal products, AVONEX, TYSABRI, TECFIDERA and RITUXAN. Although we have developed and continue to develop additional products for commercial introduction, we may be substantially dependent on sales from these products for many years. Any negative developments relating to any of these products, such as safety or efficacy issues, the introduction or greater acceptance of competing products, including biosimilars, generics or related prodrug derivatives, continued exertion of pressure on product pricing, or adverse regulatory or legislative developments, may reduce our revenues and adversely affect our results of operations. We and our competitors are introducing additional multiple sclerosis products in an increasingly crowded market and if they have a similar or more attractive profile in terms of efficacy, convenience or safety, future sales of AVONEX, TYSABRI or TECFIDERA could be adversely affected.

If we fail to successfully execute on our commercialization efforts for TECFIDERA, our future revenue growth and results of operations may be adversely affected, and our stock price may decline.

In March 2013, the FDA approved TECFIDERA, our new first-line oral treatment for people with relapsing forms of MS. If we are unable to successfully execute on our commercialization plans for TECFIDERA, our future revenue growth and results of operations may be adversely affected, and could cause a decline in our stock price. Factors that may prevent us from successfully commercializing TECFIDERA include:

- intense competition in the increasingly crowded MS market, including the possibility of future competition from generic versions of TECFIDERA or related prodrug derivatives;
- our significant reliance on third parties to manufacture TECFIDERA, including the risks these third parties may not be able to supply TECFIDERA in a timely and cost-effective manner or in compliance with applicable regulations or otherwise fail to have sufficient aggregate manufacturing capacity to satisfy demand;
- our sales and marketing efforts may not result in product revenues that meet the investment community's expectations for TECFIDERA;
- further delay in our anticipated launch of TECFIDERA in the E.U. or the failure to obtain regulatory data protection for TECFIDERA in the E.U.;
- damage to our sales and reputation, and physician and patient confidence in TECFIDERA relating to any adverse experiences or events that may occur with patients treated with TECFIDERA, including any PML cases that may develop in patients previously treated with TYSABRI that switch to therapy with TECFIDERA; and
- the other risks related to commercialization of new products described throughout these "Risk Factors".

We are in the early stages of our U.S. commercial launch of TECFIDERA and there is a limited amount of prescription, patient compliance and retention and other data available to date. These limited results may not be indicative of future performance or trends or the impact of TECFIDERA on our other products or the products of our competitors.

If we are unable to adequately protect and enforce our data, intellectual property and other proprietary rights, our competitors may take advantage of our development efforts or our acquired technology.

We have filed numerous patent applications in the U.S. and various other countries seeking protection of the processes, products and other inventions originating from our research and development. Patents have been issued on many of these applications. We have also obtained rights to various patents and patent applications under licenses with third parties, which provide for the payment of royalties by us. The ultimate degree of patent protection that will be afforded to drug and biotechnology products and processes, including ours, in the U.S. and in other important markets remains uncertain and is dependent upon the scope of protection decided upon by the patent offices, courts and lawmakers in these countries. Our patents may not afford us substantial protection or commercial benefit. Similarly, our pending patent applications or patent applications licensed from third parties may not ultimately be granted as patents and we may not prevail if patents that have

been issued or licensed to us are challenged in court. In addition, court decisions or patent office regulations that place additional restrictions on patent claim scope or that facilitate patent challenges could also reduce our ability to protect our intellectual property rights. If we cannot prevent others from exploiting our inventions, we will not derive the benefit from them that we currently expect.

Our products may qualify for regulatory data protection, which provides to the holder of a marketing authorization, for a set period of time, the exclusive use of the proprietary pre-clinical and clinical data that it compiled at significant cost and submitted to regulatory authorities to obtain approval of a product. Our products also may qualify for market protection from regulatory authorities, pursuant to which a regulatory authority may not permit for a set period of time, the approval or commercialization of another product containing the same active ingredient(s) as our product. After the set period of time, third parties are then permitted to rely upon our data to obtain approval of their abbreviated applications to market generic drugs and biosimilars. Although the World Trade Organization's agreement on trade-related aspects of intellectual property rights (TRIPS) requires signatory countries to provide regulatory data protection to innovative pharmaceutical products, implementation and enforcement varies widely from country to country. Failure to qualify for regulatory data or market protection, or failure to obtain the extent or duration of such protections that we expect in each of the markets for our products, could affect our revenue for our products or our decision on whether to market our products in a particular country or countries or could otherwise have an adverse impact on our results of operations.

Our drugs and biologics are susceptible to competition from generics and biosimilars in many markets. The legal and regulatory pathways leading to approval of generics and biosimilars vary widely from country to country and in some cases are not well defined. Manufacturers of generics and biosimilars may choose to launch or attempt to launch their products before the expiration of patent or regulatory data or market protection and to concurrently challenge the patent and regulatory protections covering our products. In the U.S., a high proportion of all approved innovative drugs are met with generic challenge as early as four years following approval. In the E.U., drugs that do not have regulatory data protection may face immediate generic competition. Generic versions of drugs and biosimilars are likely to be sold at substantially lower prices than branded products because the generic or biosimilar manufacturer would not have to recoup the research and development and marketing costs associated with the branded product. Accordingly, the introduction of generic or biosimilar versions of our marketed products likely would significantly reduce both the price that we receive for such marketed products and the volume of products that we sell, which may have an adverse impact on our results of operations.

We also rely upon unpatented proprietary and confidential information and technology in the research, development and manufacture of our products. We cannot ensure that others will not independently develop substantially equivalent information and technology or otherwise gain access to our trade secrets or disclose such technology, or that we can meaningfully protect such rights. We protect such information principally through confidentiality agreements with our employees, consultants, outside scientific collaborators, scientists whose research we sponsor and other advisers. These agreements may not provide meaningful protection or adequate remedies for our unpatented confidential information in the event of use or disclosure of such information.

TYSABRI's sales growth is important to our success.

We expect that our revenue growth over the next several years will be dependent in part upon sales of TYSABRI. If we are not successful in growing sales of TYSABRI, our future business plans, revenue growth and results of operations may be adversely affected.

TYSABRI's sales growth is uncertain given the significant restrictions on use and the significant safety warnings in the label, including the risk of developing progressive multifocal leukoencephalopathy (PML), a serious brain infection. The risk of developing PML increases with prior immunosuppressant use, which may cause patients who have previously received immunosuppressants or their physicians to refrain from using or prescribing TYSABRI. The risk of developing PML also increases with longer treatment duration, which may cause prescribing physicians or patients to suspend treatment with TYSABRI. The risk of developing PML also increases with exposure to JC virus, which may be indicated by the presence of anti-JCV antibodies. Patients testing positive for anti-JCV antibodies or their physicians may refrain from using or prescribing TYSABRI. Increased incidences of PML could limit sales growth, prompt regulatory review, require significant changes to the label or result in market withdrawal. Additional regulatory restrictions on the use of TYSABRI or safety-related label changes, including enhanced risk management programs, whether as a result of additional cases of PML, changes to the criteria for confirming PML diagnosis or otherwise, may significantly reduce expected revenues and require significant expense and management time to address the associated legal and regulatory issues. Sales growth of TYSABRI may also be adversely affected by unexpected difficulties or inefficiencies we encounter in managing our TYSABRI operations following the completion of our acquisition of full ownership of TYSABRI from Elan in April 2013. Increased competition, including competition from our own products, could also negatively impact future sales.

As we continue to research and develop protocols and therapies intended to reduce risk and improve outcomes of PML in patients, regulatory authorities may not agree with our perspective on such protocols and therapies. Our efforts at stratifying patients into groups with lower or higher risk for developing PML may not result in corresponding changes to the TYSABRI label. Furthermore, our risk stratification efforts may have an adverse impact on prescribing behavior and reduce sales of TYSABRI. The potential utility of the JC virus antibody assay as a risk stratification tool may be diminished as a result of both the assay's false negative rate as well as the possibility that a patient who initially tests negative for the JC virus antibody may acquire the JC virus after testing. An increase in the recommended frequency of retesting with the assay or in the assay's sensitivity may exacerbate these risks or otherwise adversely impact prescribing behavior. In addition, new data may challenge the assumptions or estimates underlying our risk stratification tools, including estimates of the prevalence of JC virus in the general population.

We may be unable to successfully commercialize new product candidates.

We have filed or are preparing to file applications for marketing approval for multiple product candidates. These late-stage product candidates will impact our prospects for additional revenue growth and will require significant pre-launch investments that may not be recovered if they do not receive marketing approval.

Our ability to successfully commercialize a product candidate that receives marketing approval depends on a number of factors, including:

- the medical community's acceptance of the product and the confidence of patients in the product;
- the effectiveness of our sales force and marketing efforts;
- the size of the patient population and our ability to identify new patients;
- pricing and the extent of reimbursement from third party payors;
- the ability to obtain and maintain data or market exclusivity for our products in the relevant indication(s);
- the availability or introduction of competing treatments that are deemed more effective, safer, more convenient, or less expensive;
- manufacturing the product in a timely and cost-effective manner; and
- compliance with complex regulatory requirements.

We have filed an application for marketing approval for TECFIDERA with the European Medicines Agency (EMA). In addition to the risks described above and throughout these "*Risk Factors*," other factors that may prevent us from successfully commercializing TECFIDERA, if approved by the EMA, include those factors described above relating to our commercial launch of TECFIDERA in the U.S.

We have filed applications with the FDA, and plan to file applications with the EMA, for marketing approval for our long-lasting blood clotting factor candidates for the treatment of hemophilia. In addition to the risks described above and throughout these "*Risk Factors*," other factors that may prevent us from successfully commercializing our long-lasting blood clotting factor candidates, if approved, include:

- the hemophilia treatment market is highly competitive, with current treatments marketed by companies that have substantially greater financial resources and marketing expertise, and we may have difficulty penetrating this highly competitive market unless our long-lasting blood clotting factor candidates are regarded as offering substantial benefits over current treatments;
- we do not have marketing experience within the hemophilia treatment market or well-established relationships with the associated medical and scientific community;
- filing of our planned marketing authorization applications with the EMA requires the submission of positive pediatric data from our ongoing global pediatric studies with our applications, and there can be no assurance that we will receive such positive data; and
- several companies are working to develop additional treatments for hemophilia and may obtain marketing approval of their treatments before we do, which could include an application as an orphan drug candidate in the case of the European Union which could result in a period of market exclusivity for that drug candidate, or may introduce longer-lasting or more efficacious, safer, cheaper or more convenient treatments than our long-lasting blood clotting factor candidates.

Our long-term success depends upon the successful development of other product candidates.

Our long-term viability and growth will depend upon the successful development of new products from our research and development activities, including products licensed from third parties. Product development is very expensive and involves a high degree of risk. Only a small number of research and development programs result in the commercialization of a product. Success in preclinical work or early stage clinical trials does not ensure that later stage or larger scale clinical trials will be successful. Conducting clinical trials is a complex, time-consuming and expensive process. Our ability to complete our clinical trials in a timely fashion depends in large part on a number of key factors including protocol design, regulatory and institutional review board approval, the rate of patient enrollment in clinical trials, and compliance with extensive current Good Clinical Practices. We have opened clinical sites and are enrolling patients in a number of countries where our experience is more limited, and we are in most cases using the services of third party clinical trial providers. If we fail to adequately manage the design, execution and regulatory aspects of our large, complex and diverse clinical trials, our studies and ultimately our regulatory approvals may be delayed or we may fail to gain approval for our product candidates. Clinical trials may indicate that our product candidates have harmful side effects or raise other safety concerns that may significantly reduce the likelihood of regulatory approval, result in significant restrictions on use and safety warnings in any approved label, adversely affect placement within the treatment paradigm, or otherwise significantly diminish the commercial potential of the product candidate. Also, positive results in a registrational trial may not be replicated in any subsequent confirmatory trials. Even if later stage clinical trials are successful, regulatory authorities may disagree with our view of the data or require additional studies, may fail to approve the facilities or the process used to manufacture the product candidate, and may fail to approve or delay approval of our product candidates or may grant marketing approval that is more restricted than anticipated, including indications for a narrower patient population than expected and the imposition of safety monitoring or educational requirements or risk evaluation and mitigation strategies. The occurrence of any such events could result in the incurrence of significant costs and expenses and could otherwise have an adverse effect on our business, including our financial condition and results of operations. In addition, if another company is the first to file for marketing approval of a competing orphan drug candidate, that company may ultimately receive marketing exclusivity for its drug candidate, preventing us from commercializing our orphan drug candidate in the applicable market for several years.

If we fail to compete effectively, our business and market position would suffer.

The biotechnology and pharmaceutical industry is intensely competitive. We compete in the marketing and sale of our products, the development of new products and processes, the acquisition of rights to new products with commercial potential and the hiring and retention of personnel. We compete with biotechnology and pharmaceutical companies that have a greater number of products on the market and in the product pipeline, greater financial and other resources and other technological or competitive advantages. One or more of our competitors may benefit from significantly greater sales and marketing capabilities, may develop products that are accepted more widely than ours and may receive patent protection that dominates, blocks or adversely affects our product development or business. In addition, health care reform legislation enacted in the U.S. in 2010 has created a pathway for the FDA to approve biosimilars, which could compete on price and differentiation with products that we now or could in the future market. The introduction by our competitors of more efficacious, safer, cheaper, or more convenient alternatives to our products could reduce our revenues and the value of our product development efforts.

Adverse safety events can negatively affect our business and stock price.

Adverse safety events involving our marketed products may have a negative impact on our commercialization efforts. Discovery of safety issues with our products could cause product liability events, additional regulatory scrutiny and requirements for additional labeling, withdrawal of products from the market and the imposition of fines or criminal penalties. Any of these actions could result in material write-offs of inventory, material impairments of intangible assets, goodwill and fixed assets, material restructuring charges and other adverse impacts on our results of operations. Regulatory authorities have been moving towards more active and transparent pharmacovigilance and are making greater amounts of stand-alone safety information directly available to the public through periodic safety update reports, patient registries and other reporting requirements. The reporting of adverse safety events involving our products or products similar to ours and public rumors about such events could cause our product sales or stock price to decline or experience periods of volatility.

We depend, to a significant extent, on reimbursement from third party payors and a reduction in the extent of reimbursement could reduce our product sales and revenue.

Sales of our products are dependent, in large part, on the availability and extent of reimbursement from government health administration authorities, private health insurers and other organizations. Changes in government regulations or private third-party payors' reimbursement policies may reduce reimbursement for our products and adversely affect our future results. In addition, when a new medical product is approved, the availability of government and private reimbursement for that product is uncertain, as is the amount for which that product will be reimbursed. We cannot predict the availability or amount of reimbursement for our product candidates.

In the U.S., federal and state legislatures, health agencies and third-party payors continue to focus on containing the cost of health care. The 2010 Patient Protection and Affordable Care Act encourages the development of comparative effectiveness research and any adverse findings for our products from such research may reduce the extent of reimbursement for our products. Economic pressure on state budgets may result in states increasingly seeking to achieve budget savings through mechanisms that limit coverage or payment for our drugs. In recent years, some states have considered legislation that would control the prices of drugs. State Medicaid programs are increasingly requesting manufacturers to pay supplemental rebates and requiring prior authorization by the state program for use of any drug for which supplemental rebates are not being paid. Managed care organizations continue to seek price discounts and, in some cases, to impose restrictions on the coverage of particular drugs. Government efforts to reduce Medicaid expenses may lead to increased use of managed care organizations by Medicaid programs. This may result in managed care organizations influencing prescription decisions for a larger segment of the population and a corresponding constraint on prices and reimbursement for our products.

On March 1, 2013, the across-the-board U.S. federal government spending cuts, known as “sequestration”, went into effect. These reductions included a 2% reduction in Medicare reimbursements rates to providers, such as physicians, hospitals and drug plans. These cuts, which reduce payments to health care providers for Part B drugs, could affect decisions regarding prescribing patterns or site of care, which could adversely impact sales of our products such as our infusible drugs, TYSABRI and RITUXAN. In addition, Part D plans managing outpatient prescription drugs that are receiving less reimbursement from the government could seek further discounts from manufacturers, which could adversely affect our sales of our Part D drugs, such as AVONEX and TECFIDERA.

There is continued uncertainty regarding the potential impact of the recent shutdown of the U.S. federal government in October 2013 and the ongoing debates related to the federal budget deficit and debt ceiling, which may result in changes to monetary and fiscal policies and health care legislation in the U.S. In the context of ongoing discussions to reduce the federal budget deficit, additional proposals that have been raised to address government finances include changes to the Medicare program, such as implementation of mandatory Part D rebates for dual-eligible beneficiaries, increased co-payments, reductions in premium subsidies, increases to the pharmaceutical fee, changes to the coverage gap and further reductions in physician payments for Part B drugs. If enacted, these changes to current policy, together with continuing federal budget cuts, could result in increased pricing pressure and reduced reimbursement for our products, which could have a material impact on our financial position or results of operations.

In the European Union and some other international markets, the government provides health care at low cost to consumers and regulates pharmaceutical prices, patient eligibility or reimbursement levels to control costs for the government-sponsored health care system. Many countries have announced or implemented measures to reduce health care costs to constrain their overall level of government expenditures. These measures vary by country and may include, among other things, patient access restrictions, suspensions on price increases, prospective and possibly retroactive price reductions and other recoupments and increased mandatory discounts or rebates, recoveries of past price increases, and greater importation of drugs from lower-cost countries to higher-cost countries. These measures have negatively impacted our revenues, and may continue to adversely affect our revenues and results of operations in the future. In addition, certain countries set prices by reference to the prices in other countries where our products are marketed. Thus, our inability to secure adequate prices in a particular country may not only limit the marketing of our products within that country, but may also adversely affect our ability to obtain acceptable prices in other markets. This may create the opportunity for third party cross border trade or influence our decision to sell or not to sell a product, thus adversely affecting our geographic expansion plans and revenues.

Adverse market and economic conditions may exacerbate certain risks affecting our business.

Sales of our products are dependent on reimbursement from government health administration authorities, private health insurers, distribution partners and other organizations. These organizations may reduce the extent of reimbursements, increase their scrutiny of claims, delay payment or be unable to satisfy their reimbursement obligations due to deteriorating global economic conditions, uncertainty about the direction and relative strength of the U.S. economy and resolution of the U.S. budget deficit, the continuing European financial crisis, volatility in the credit and financial markets, and other disruptions due to natural disasters, political instability or otherwise.

The European market represents a major part of our business and most of our marketing efforts outside the U.S. are focused on Europe. Thus, the continued uncertainty of the credit and economic conditions in Italy, Spain and Portugal, among other members of the European Union, subjects us to credit risk from accounts receivable related to our product sales in these countries, which may have a significant adverse impact on our results of operations. Our accounts receivable in certain European countries, such as Spain, Italy and Portugal, are subject to significant payment delays due to government funding and reimbursement practices. European governments have announced or implemented austerity measures to constrain the overall level of government expenditures, including reforming health care coverage and reducing health care costs. These measures continue to exert pressure on product pricing, have negatively impacted our revenues and results of operations, have delayed reimbursement for our products and may encourage higher levels of third party cross border trade. Continued adverse market and economic conditions in the European market could result in further reimbursement delays, reduce our product sales and revenues, result in additional allowances or significant bad debts, or cause us to recognize revenue in certain countries on a cash basis.

We depend on collaborators and other third-parties for both product and royalty revenue and the clinical development of future products, which are outside of our full control.

We have a number of collaborators and partners, and have both in-licensed and out-licensed several products and programs. In addition to the factors described throughout these “*Risk Factors*,” these collaborations are subject to several other risks, including:

- Our RITUXAN revenues are dependent on the efforts of Genentech and the Roche Group. Their interests may not always be aligned with our interests and they may not market RITUXAN in the same manner or to the same extent that we would, which could adversely affect our RITUXAN revenues.
- Under our collaboration agreement with Genentech, the successful development and commercialization of GA101 and certain other anti-CD20 products will decrease our percentage of the collaboration's co-promotion profits.
- Any failure on the part of our collaborators to comply with applicable laws and regulatory requirements in the sale, marketing and maintenance of the market authorization of our products or to fulfill any responsibilities they may have to protect and enforce any intellectual property rights underlying our products could have an adverse effect on our revenues as well as involve us in possible legal proceedings.
- Collaborations often require the parties to cooperate, and failure to do so effectively could have an adverse impact on product sales by our collaborators, and could adversely affect the clinical development or regulatory approvals of products under joint control.

In addition, we rely on third parties for several other aspects of our business. As a sponsor of clinical trials of our products, we rely on third party contract research organizations to carry out most of our clinical trial related activities and accurately report their results. These activities include initiating and monitoring the conduct of studies at clinical trial sites, identifying any noncompliance with the study protocol or current Good Clinical Practices and interfacing with regulators throughout the process. The failure of a contract research organization to conduct these activities with proper vigilance and competence and in accordance with current Good Clinical Practices can result in regulatory authorities rejecting our clinical trial data or, in some circumstances, the imposition of civil or criminal sanctions against us.

Manufacturing issues could substantially increase our costs and limit supply of our products.

The process of manufacturing our products is complex, highly regulated and subject to several risks:

- The process of manufacturing biologics, such as AVONEX, TYSABRI and RITUXAN, is extremely susceptible to product loss due to contamination, oxidation, equipment failure or improper installation or operation of equipment, or vendor or operator error. Even minor deviations from normal manufacturing processes could result in reduced production yields, product defects and other supply disruptions. If microbial, viral or other contaminations are discovered in our products or manufacturing facilities, we may need to close our manufacturing facilities for an extended period of time to investigate and remediate the contaminant.

- We rely on third party suppliers and manufacturers for, among other things, RITUXAN manufacturing, the majority of our clinical and commercial requirements for small molecule products (such as TECFIDERA and FAMPYRA) and product candidates, raw materials and supplies for production of FAMPYRA, our fill-finish operations, the majority of our final product storage, and a substantial portion of our packaging operations. In addition, due to the unique manner in which our products are manufactured, we rely on single source providers of several raw materials and manufacturing supplies. These third parties are independent entities subject to their own unique operational and financial risks that are outside of our control. These third parties may not perform their obligations in a timely and cost-effective manner or in compliance with applicable regulations, and they may be unable or unwilling to increase production capacity commensurate with demand for our existing or future products. Finding alternative providers could take a significant amount of time and involve significant expense due to the specialized nature of the services and the need to obtain regulatory approval of any significant changes to our suppliers or manufacturing methods. We cannot be certain that we could reach agreement with alternative providers or that the FDA or other regulatory authorities would approve our use of such alternatives.
- We have relied on our manufacturing facility in Research Triangle Park, North Carolina for the production of TYSABRI. Our production of TYSABRI will also rely on our recently approved manufacturing facility in Hillerød, Denmark, which has a limited operating history. Our global bulk supply of TYSABRI depends on the uninterrupted and efficient operation of these facilities, which could be adversely affected by equipment failures, labor shortages, natural disasters, power failures and numerous other factors. If we are unable to meet demand for TYSABRI for any reason, we would need to rely on a limited number of qualified third party contract manufacturers.
- We and our third party providers are generally required to maintain compliance with current Good Manufacturing Practices and other stringent requirements and are subject to inspections by the FDA and comparable agencies in other jurisdictions to confirm such compliance. Any delay, interruption or other issues that arise in the manufacture, fill-finish, packaging, or storage of our products as a result of a failure of our facilities or the facilities or operations of third parties to pass any regulatory agency inspection could significantly impair our ability to develop and commercialize our products. Significant noncompliance could also result in the imposition of monetary penalties or other civil or criminal sanctions and damage our reputation.

Any adverse developments affecting our manufacturing operations or the operations of our third-party suppliers and manufacturers may result in shipment delays, inventory shortages, lot failures, product withdrawals or recalls, or other interruptions in the commercial supply of our products. We may also have to take inventory write-offs and incur other charges and expenses for products that fail to meet specifications, undertake costly remediation efforts or seek more costly manufacturing alternatives. Such developments could increase our manufacturing costs, cause us to lose revenue or market share as patients and physicians turn to competing therapeutics, diminish our profitability or damage our reputation.

If we fail to comply with the extensive legal and regulatory requirements affecting the health care industry, we could face increased costs, penalties and a loss of business.

Our activities, and the activities of our collaborators and third party providers, are subject to extensive government regulation and oversight both in the U.S. and in foreign jurisdictions. The FDA and comparable agencies in other jurisdictions directly regulate many of our most critical business activities, including the conduct of preclinical and clinical studies, product manufacturing, advertising and promotion, product distribution, adverse event reporting and product risk management. Our interactions in the U.S. or abroad with physicians and other health care providers that prescribe or purchase our products are also subject to government regulation designed to prevent fraud and abuse in the sale and use of the products and place greater restrictions on the marketing practices of health care companies. Health care companies are facing heightened scrutiny of their relationships with health care providers from anti-corruption enforcement officials. In addition, pharmaceutical and biotechnology companies have been the target of lawsuits and investigations alleging violations of government regulation, including claims asserting submission of incorrect pricing information, impermissible off-label promotion of pharmaceutical products, payments intended to influence the referral of health care business, submission of false claims for government reimbursement, antitrust violations, or violations related to environmental matters. These risks may be heightened as we continue to expand our global operations and introduce additional products to the market.

Regulations governing the health care industry are subject to change, with possibly retroactive effect, including:

- new laws, regulations or judicial decisions, or new interpretations of existing laws, regulations or decisions, related to health care availability, pricing or marketing practices, compliance with wage and hour laws and other employment practices, method of delivery, payment for health care products and services, compliance with data privacy laws and regulations, tracking payments and other transfers of value made to physicians and teaching hospitals, and extensive anti-bribery and anti-corruption prohibitions;

- changes in the FDA and foreign regulatory approval processes that may delay or prevent the approval of new products and result in lost market opportunity; and
- changes in FDA and foreign regulations that may require additional safety monitoring, labeling changes, restrictions on product distribution or use, or other measures after the introduction of our products to market, which could increase our costs of doing business, adversely affect the future permitted uses of approved products, or otherwise adversely affect the market for our products.

Examples of previously enacted and possible future changes in laws that could adversely affect our business include the enactment in the U.S. of health care reform, potential regulations easing the entry of competing biosimilars in the marketplace, new legislation or implementation of existing statutory provisions on importation of lower-cost competing drugs from other jurisdictions, and enhanced penalties for and investigations into non-compliance with U.S. fraud and abuse laws.

Violations of governmental regulation may be punishable by criminal and civil sanctions against us, including fines and civil monetary penalties and exclusion from participation in government programs, including Medicare and Medicaid, as well as against executives overseeing our business. In addition to penalties for violation of laws and regulations, we could be required to repay amounts we received from government payors, or pay additional rebates and interest if we are found to have miscalculated the pricing information we have submitted to the government. Whether or not we have complied with the law, an investigation into alleged unlawful conduct could increase our expenses, damage our reputation, divert management time and attention and adversely affect our business.

Uncertainty over intellectual property in the biotechnology industry has been the source of litigation and other disputes, which is inherently costly and unpredictable.

We are aware that others, including various universities and companies working in the biotechnology field, have filed patent applications and have been granted patents in the U.S. and in other countries claiming subject matter potentially useful to our business. Some of those patents and patent applications claim only specific products or methods of making such products, while others claim more general processes or techniques useful or now used in the biotechnology industry. There is considerable uncertainty within our industry about the validity, scope and enforceability of many issued patents in the U.S. and elsewhere in the world, and, to date, the law and practice remains in substantial flux both in the agencies that grant patents and in the courts. We cannot currently determine the ultimate scope and validity of patents which may be granted to third parties in the future or which patents might be asserted to be infringed by the manufacture, use and sale of our products, services or technologies.

There has been, and we expect that there may continue to be, significant litigation in the industry regarding patents and other intellectual property rights. Litigation, arbitrations, administrative proceedings and other legal actions with private parties and governmental authorities concerning patents and other intellectual property rights may be protracted, expensive and distracting to management. Competitors may sue us as a way of delaying the introduction of our products. Any litigation, including any interference proceedings to determine priority of inventions, oppositions to patents in foreign countries or litigation against our partners, may be costly and time consuming and could harm our business. We expect that litigation may be necessary in some instances to determine the validity and scope of certain of our proprietary rights. Litigation may be necessary in other instances to determine the validity, scope or non-infringement of certain patent rights claimed by third parties to be pertinent to the manufacture, use or sale of our products. Ultimately, the outcome of such litigation could adversely affect the validity and scope of our patent or other proprietary rights, hinder our ability to manufacture and market our products, or result in the assessment of significant monetary damages against us that may exceed amounts, if any, accrued in our financial statements.

To the extent that valid present or future third party patent or other intellectual property rights cover our products, services or technologies, we or our strategic collaborators may seek licenses or other agreements from the holders of such rights in order to avoid or settle legal claims. Such licenses may not be available on acceptable terms, which may hinder our ability to manufacture and market our products and services. Payments under any licenses that we are able to obtain would reduce our profits derived from the covered products and services.

Our sales and operations are subject to the risks of doing business internationally.

We are increasing our presence in international markets, which subjects us to many risks, such as:

- the inability to obtain necessary foreign regulatory or pricing approvals of products in a timely manner;
- fluctuations in currency exchange rates;
- difficulties in staffing and managing international operations;

- the imposition of governmental controls;
- less favorable intellectual property or other applicable laws;
- increasingly complex standards for complying with foreign laws and regulations that may differ substantially from country to country and may conflict with corresponding U.S. laws and regulations;
- the emergence of far-reaching anti-bribery and anti-corruption legislation in the U.K., including passage of the U.K. Bribery Act 2010, and elsewhere and escalation of investigations and prosecutions pursuant to such laws;
- restrictions on direct investments by foreign entities and trade restrictions;
- greater political or economic instability; and
- changes in tax laws and tariffs.

In addition, our international operations are subject to regulation under U.S. law. For example, the Foreign Corrupt Practices Act prohibits U.S. companies and their representatives from offering, promising, authorizing or making payments to foreign officials for the purpose of obtaining or retaining business abroad. In many countries, the health care professionals we regularly interact with may meet the definition of a foreign government official for purposes of the Foreign Corrupt Practices Act. Failure to comply with domestic or foreign laws could result in various adverse consequences, including possible delay in approval or refusal to approve a product, recalls, seizures or withdrawal of an approved product from the market, the imposition of civil or criminal sanctions and the prosecution of executives overseeing our international operations.

Our business may be adversely affected if we do not manage our current growth and do not successfully execute our growth initiatives.

We have experienced growth in our headcount and operations, which has placed, and will continue to place, significant demands on our management and our operational and financial infrastructure. We anticipate further growing through both internal development projects as well as external opportunities, which include the acquisition, partnering and in-licensing of products, technologies and companies or the entry into strategic alliances and collaborations. The availability of high quality development opportunities is limited and we are not certain that we will be able to identify candidates that we and our shareholders consider suitable or complete transactions on terms that are acceptable to us and our shareholders. In order to pursue such opportunities, we may require significant additional financing, which may not be available to us on favorable terms, if at all. Even if we are able to successfully identify and complete acquisitions and other strategic alliances and collaborations, we may not be able to integrate them or take full advantage of them and therefore may not realize the benefits that we expect.

To effectively manage our current and future potential growth, we will need to continue to enhance our operational, financial and management processes and to effectively expand, train and manage our employee base. Supporting our growth initiatives will require significant capital expenditures and management resources, including investments in research and development, sales and marketing, manufacturing and other areas of our business. If we do not successfully manage our current growth and do not successfully execute our growth initiatives, then our business and financial results may be adversely affected and we may incur asset impairment or restructuring charges.

Our investments in properties, including our manufacturing facilities, may not be fully realizable.

We own or lease real estate primarily consisting of buildings that contain research laboratories, office space, and biologic manufacturing operations. For strategic or other operational reasons, we may decide to further consolidate or co-locate certain aspects of our business operations or dispose of one or more of our properties, some of which may be located in markets that are experiencing high vacancy rates and decreasing property values. If we determine that the fair value of any of our owned properties is lower than their book value we may not realize the full investment in these properties and incur significant impairment charges. If we decide to fully or partially vacate a leased property, such as is expected in connection with the relocation of our corporate headquarters from Weston, Massachusetts to Cambridge, Massachusetts, we may incur significant cost, including lease termination fees, rent expense in excess of sublease income and impairment of leasehold improvements. In addition, we may not fully utilize our manufacturing facilities, resulting in idle time at facilities or substantial excess manufacturing capacity, due to reduced expectations of product demand, improved yields on production and other factors. Any of these events may have an adverse impact on our results of operations.

Our effective tax rate may fluctuate and we may incur obligations in tax jurisdictions in excess of accrued amounts.

As a global biotechnology company, we are subject to taxation in numerous countries, states and other jurisdictions. As a result, our effective tax rate is derived from a combination of applicable tax rates in the various places that we operate. In preparing our financial statements, we estimate the amount of tax that will become payable in each of such places. Our effective tax rate, however, may be different than experienced in the past due to numerous factors, including changes in the mix of our profitability from country to country, the results of audits of our tax filings, changes in accounting for income taxes and changes in tax laws. Any of these factors could cause us to experience an effective tax rate significantly different from previous periods or our current expectations.

In addition, our inability to secure or sustain acceptable arrangements with tax authorities and previously enacted or future changes in the tax laws, among other things, may result in tax obligations in excess of amounts accrued in our financial statements.

In the U.S., there are several proposals under consideration to reform tax law, including proposals that may reduce or eliminate the deferral of U.S. income tax on our unrepatriated earnings, scrutinize certain transfer pricing structures, and reduce or eliminate certain foreign tax credits. Our future reported financial results may be adversely affected by tax law changes which restrict or eliminate certain foreign tax credits or our ability to deduct expenses attributable to foreign earnings, or otherwise affect the treatment of our unrepatriated earnings.

The growth of our business depends on our ability to attract and retain qualified personnel and to develop and maintain key relationships.

The achievement of our commercial, research and development and external growth objectives depends upon our ability to attract and retain qualified scientific, manufacturing, sales and marketing and executive personnel and to develop and maintain relationships with qualified clinical researchers and key distributors. Competition for these people and relationships is intense and comes from a variety of sources, including pharmaceutical and biotechnology companies, universities and non-profit research organizations.

Pending and future product liability claims may adversely affect our business and our reputation.

The administration of drugs in humans, whether in clinical studies or commercially, carries the inherent risk of product liability claims whether or not the drugs are actually the cause of an injury. Our products or product candidates may cause, or may appear to have caused, injury or dangerous drug interactions, and we may not learn about or understand those effects until the product or product candidate has been administered to patients for a prolonged period of time.

We are subject from time to time to lawsuits based on product liability and related claims. We cannot predict with certainty the eventual outcome of any pending or future litigation. We may not be successful in defending ourselves in the litigation and, as a result, our business could be materially harmed. These lawsuits may result in large judgments or settlements against us, any of which could have a negative effect on our financial condition and business if in excess of our insurance coverage. Additionally, lawsuits can be expensive to defend, whether or not they have merit, and the defense of these actions may divert the attention of our management and other resources that would otherwise be engaged in managing our business.

Our operating results are subject to significant fluctuations.

Our quarterly revenues, expenses and net income (loss) have fluctuated in the past and are likely to fluctuate significantly in the future due to the risks described in these “Risk Factors” as well as the timing of charges and expenses that we may take. We have recorded, or may be required to record, charges that include:

- the cost of restructurings;
- impairments with respect to investments, fixed assets, and in-process research and development and other long-lived assets;
- inventory write-downs for failed quality specifications, charges for excess or obsolete inventory and charges for inventory write downs relating to product suspensions;
- bad debt expenses and increased bad debt reserves;
- outcomes of litigation and other legal proceedings, regulatory matters and tax matters;
- milestone payments under license and collaboration agreements; and
- payments in connection with acquisitions and other business development activity.

Our revenues are also subject to foreign exchange rate fluctuations due to the global nature of our operations. We recognize foreign currency gains or losses arising from our operations in the period in which we incur those gains or losses. Although we have foreign currency forward contracts to hedge specific forecasted transactions denominated in foreign currencies, our efforts to reduce currency exchange losses may not be successful. As a result, currency fluctuations among our reporting currency, the U.S. dollar, and the currencies in which we do business will affect our operating results, often in unpredictable ways. Our net income may also fluctuate due to the impact of charges we may be required to take with respect to foreign currency hedge transactions. In particular, we may incur higher than expected charges from hedge ineffectiveness or from the termination of a hedge relationship.

In addition, our operating results during any one period do not necessarily suggest the anticipated results of future periods.

Our portfolio of marketable securities is subject to market, interest and credit risk that may reduce its value.

We maintain a portfolio of marketable securities for investment of our cash. Changes in the value of our portfolio of marketable securities could adversely affect our earnings. In particular, the value of our investments may decline due to increases in interest rates, downgrades of the bonds and other securities included in our portfolio, instability in the global financial markets that reduces the liquidity of securities included in our portfolio, declines in the value of collateral underlying the mortgage and asset-backed securities included in our portfolio, and other factors. Each of these events may cause us to record charges to reduce the carrying value of our investment portfolio or sell investments for less than our acquisition cost. Although we attempt to mitigate these risks by investing in high quality securities and continuously monitoring our portfolio's overall risk profile, the value of our investments may nevertheless decline.

Our business involves environmental risks, which include the cost of compliance and the risk of contamination or injury.

Our business and the business of several of our strategic partners involve the controlled use of hazardous materials, chemicals, biologics and radioactive compounds. Although we believe that our safety procedures for handling and disposing of such materials comply with state and federal standards, there will always be the risk of accidental contamination or injury. If we were to become liable for an accident, or if we were to suffer an extended facility shutdown, we could incur significant costs, damages and penalties that could harm our business. Biologics manufacturing also requires permits from government agencies for water supply and wastewater discharge. If we do not obtain appropriate permits, or permits for sufficient quantities of water and wastewater, we could incur significant costs and limits on our manufacturing volumes that could harm our business.

Provisions in our Genentech collaboration agreement may discourage a third party from attempting to acquire us.

Provisions in our collaboration agreement with Genentech might discourage a takeover attempt that could be viewed as beneficial to shareholders who wish to receive a premium for their shares from a potential bidder. Our collaboration agreement with Genentech allows Genentech to purchase our rights to RITUXAN and certain anti-CD20 products developed under the agreement if we undergo a change of control and certain other conditions are met, which may limit our attractiveness to potential acquirers.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**Issuer Purchases of Equity Securities**

The following table summarizes our common stock repurchase activity during the third quarter of 2013:

Period	Total Number of Shares Purchased (#)	Average Price Paid per Share (\$)	Total Number of Shares Purchased as Part of Publicly Announced Programs (#)	Maximum Number of Shares That May Yet Be Purchased Under Our Programs (#)
July 2013	—	—	—	5,885,526
August 2013	1,264,508	209.44	1,264,508	4,621,018
September 2013	435,492	216.87	435,492	4,185,526
Total	1,700,000	211.34		

On February 11, 2011, we announced that our Board of Directors authorized the repurchase of up to 20.0 million shares of common stock. This authorization does not have an expiration date. As of September 30, 2013, approximately 15.8 million shares of our common stock at a cost of \$1,883.0 million have been repurchased under this authorization. During the nine months ended September 30, 2013, we repurchased approximately 2.0 million shares at a cost of \$400.3 million. Of those shares, 1.7 million were repurchased during the three months ended September 30, 2013 at a cost of \$359.3 million.

Approximately 4.2 million shares of our common stock remain available for repurchase under the 2011 authorization.

Item 6. Exhibits

The exhibits listed on the Exhibit Index immediately preceding such exhibits, which is incorporated herein by reference, are filed or furnished as part of this Quarterly Report on Form 10-Q.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

**CERTIFICATION OF CHIEF EXECUTIVE OFFICER PURSUANT TO
SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002**

I, George A. Scangos, certify that:

1. I have reviewed this quarterly report of Biogen Idec Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

**CERTIFICATION OF CHIEF FINANCIAL OFFICER PURSUANT TO
SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002**

I, Paul J. Clancy, certify that:

1. I have reviewed this quarterly report of Biogen Idec Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
